Jewell, 2003-11-30 Challenging widely held beliefs this provocative book offers nothing less than a blueprint for enhancing the social and economic status of African American families Despite the implementation of liberal social policies in the 1960s and 70s successive U S administrations continue to dash the hopes and expectations of African Americans who remain subject to racism and discrimination Arguing that social policies and their absence have affected the stability of the African American family Jewell refutes the myth of significant progress for African American families emanating from the civil rights era exposing the myriad reasons why greater advancement toward equality has not occurred in major societal institutions Attention is focused on the extent to which African American families have been adversely affected by a process of assimilation that was socio psychological rather than economic This new edition builds upon the first edition and is revised and expanded to reflect new and persistent institutional policies and practices of race gender and class inequality facing African American families The revised edition explores such issues as racial profiling capital punishment police brutality predatory lending No Child Left Behind welfare reform affirmative action and racial disparities in healthcare academic achievement and home ownership Jewell proposes a

variety of strategies and policies that are needed to ensure greater social and economic equality and justice for African American families

The Survival Imperative William E. Burrows, 2007-04-01 Using Space to Save Earth Veteran science journalist William E Burrows offers a bold new mission for the US space program to protect the Earth from the ever growing number of perils that threaten our way of life and even our very survival We are living through one of the most dangerous times in human history Nuclear chemical and biological weapons technology are proliferating and missile technology is falling into more and more hands Extreme natural disasters like hurricanes floods fires and earthquakes are becoming increasingly costly not only in dollars but in lives as population expands Environmental crises threaten to provoke massive famines and widespread social collapse Asteroids the size of battleships streak within striking distance of the earth every year One strategy offers the best hope of protecting us from all of these dangers a revitalized national space program that coordinates efforts in global defense in environmental protection in communications and in military security The Survival Imperative offers an impassioned argument for this bold initiative To demonstrate the urgency of his cause Burrows presents a vivid scenario an impact by a moderately large asteroid that triggers a series of nuclear exchanges environmental devastation and the slow disintegration of civilization And he examines the existing space program from the heady days of the Moon landing through the political compromises that have characterized the history of NASA in the 35 years following our retreat from the Moon Most of all Burrows warns that the primary obstacle to achieving a true planetary defense program is not financial or scientific but social an unwillingness to acknowledge the urgency of the crisis and to take the political risks needed to address it The question says Burrows is not whether we can do it but whether we will act before it's too late At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied

White Hot Hate Dick Lehr,2021-11-30 For fans of I ll Be Gone in the Dark the thrilling true story of a would be terrorist attack against a Kansas farming town s immigrant community and the FBI informant who exposed it In the spring of 2016 as immigration debates rocked the United States three men in a militia group known as the Crusaders grew

aggravated over one Kansas town's growing Somali community. They decided that complaining about their new neighbors and threatening them directly wasn't enough. The men plotted to bomb a mosque aiming to kill hundreds and inspire other attacks against Muslims in America. But they would wait until after the presidential election so that their actions wouldn't hurt Donald Trump's chances of winning. An FBI informant befriended the three men, acting as law enforcement's eyes and ears for eight months. His secretly taped conversations with the militia were pivotal in obstructing their plans and were a lynchpin in the resulting trial and convictions for conspiracy to use a weapon of mass destruction. *White Hot Hate* will tell the riveting true story of an averted case of domestic terrorism in one of the most remote towns in the US, not far from the infamous town where Capote's *In Cold Blood* was set. In the gripping details of this foiled scheme, we see in intimate focus the chilling immediate threat of domestic terrorism and racist anxiety in America writ large.

Security professionals need to identify who terrorists might be, recognize pre-incident indicators of terrorist activity, and competently analyze intelligence information. Unfortunately, most terrorist education comes in short, sketchy briefings.
