Terrorism And Hostage Negotiations:

Terrorism And Hostage Negotiations Abraham Miller, 2019-07-11 How effective are the methods currently used to deal with hostage situations This study attempts to answer that question by examining the ways in which terrorists manipulate the hostage barricade tactic one of the most formidable and frightening devices in their arsenal and by analyzing the response of law enforcement officers and policymakers to its use Drawing on case materials and interviews with high level decision makers both in the United States and abroad who are involved with domestic and international terrorist operations Professor Miller analyzes the political and psychological motifs of hostage barricade dramas He then looks at terrorism particularly political terrorism within the broader theoretical context of the general study of political violence and the operational concerns of public decision makers and law enforcement personnel Negotiating with Terrorists Guy Olivier Faure, I. William Zartman, 2010-02-25 This edited volume addresses the important issue of negotiating with terrorists and offers recommendations for best practice and processes Hostage negotiation is the process of trying to align two often completely polarised parties Authorities view hostage taking as unacceptable demands made by unacceptable means However terrorists view their actions as completely justified even on moral and religious grounds If they are to try and reconcile these two sides it is essential for hostage negotiators to understand terrorist culture the hostage takers profiles their personality their view of the world and also the authorities their values and their framing of the problem raised by the taking of hostages Although not advocating negotiating with terrorists the volume seeks to analyse when why and how it is done Part I deals with the theory and quantifiable data produced from analysis of hostage situations while Part II explores several high profile case studies and the lessons that can be learnt from them This volume will be of great interest to students of terrorism studies conflict management negotiation security studies and IR in general I William Zartman is the Jacob Blaustein Distinguished Professor Emeritus of International Organization and Conflict Resolution and former Director of the Conflict Management and African Studies Programs at the Paul H Nitze School of Advanced International Studies Johns Hopkins University Washington DC He is a member of the Steering Committee of the Processes of International Negotiation PIN Program at the International Institute of Applied Systems Analysis IIASA in Laxenburg Austria He is author editor of over 20 books on negotiation conflict and mediation Guy Olivier Faure is Professor of Sociology at the Sorbonne University Paris I and a member of the Steering Committee of the Processes of International Negotiation PIN Program at the International Institute of Applied Systems Analysis IIASA in Laxenburg Austria He has served as an advisor to French government on hostage negotiations **Negotiating Hostage Crises with the New Terrorists** Adam Dolnik, Keith M. Fitzgerald, 2007-11-30 This book is about the role of negotiation in resolving terrorist barricade hostage crises What lessons can be learned from past deadly incidents so that crisis negotiators and decision makers can act with greater effectiveness in the future What are the lessons the terrorists are learning and how will they affect the dynamics of future incidents What can

we learn about the terrorist threat and about preventing the escalation of future terrorist hostage taking situations While there are many trained crisis negotiators around the world almost none of them has ever had contact with a terrorist hostage taking incident Further the entire training program of most hostage negotiators focuses on resolving crises that do not take into consideration issues such as ideology religion or the differing sets of strategic objectives and mindsets of ideological hostage takers This is especially true with regard to the terrorists of the new breed who have become less discriminate more lethal and more willing to execute hostages and die during the incident Further many of the paradigms and presumptions upon which the contemporary practice of crisis negotiation is based do not reflect the reality of the new terrorists The main focus of this book is on the detailed reconstruction and analysis of the two most high profile cases in recent years the Moscow theater and the Beslan school hostage crises with a clear purpose of drawing lessons for hostage negotiation strategies in the future This is an issue of top priority Terrorist manuals from countries such as Saudi Arabia and Iraq reveal that terrorist organizations are very closely observing and analyzing the lessons learned from these two incidents suggesting that we are likely to see this type of new terrorist hostage taking involving large numbers of suicide fighters and executions of hostages at some point in the future This raises a wide array of questions about appropriate responses and negotiation strategies From the first glance it is clear that we are not prepared
