Interaction and the Standardized Survey Interview Hanneke Houtkoop-Steenstra, 2000-08-03 This study investigates in detail the interaction between interviewers and respondents in standardised social survey interviews Applying the techniques of conversation analysis Hanneke Houtkoop Steenstra reveals how certain rules of normal conversation fail to apply in interviews based on a standard questionnaire and offers original empirical evidence to show what really happens Her book demonstrates that interview results can only be understood as

products of the contingencies of the interview situation and not as is usually assumed the unmediated expressions of respondents' real opinions. Her conclusions have important implications for anyone interested in effective survey compilation and interpretation. The book is highly accessible, setting out the basic tools of conversation analysis simply and clearly and suggesting ways of improving questionnaire design wherever possible. Its approach will be of great interest to students and researchers of survey methodology.

The Cambridge Handbook of Methods in Conversation Analysis Jeffrey D. Robinson, Rebecca Clift, Robin H. Kendrick, Chase Wesley Raymond, 2024-12-05. Conversation Analysis (CA) is one of the predominant methods for the detailed study of human social interaction. Bringing together thirty-four chapters written by a team of world-renowned experts, this Handbook represents the first comprehensive overview of conversational analytic methods. Topics include how to collect, manage, and transcribe data; how to explore data in search of possible phenomena; how to form and develop collections of phenomena; how to use different types of evidence to analyze data; how to code and quantify interaction; and how to apply, publish, and communicate findings to those who stand to benefit from them. Each method is introduced clearly and systematically, and examples of CA in different languages and cultures are included to show how it can be applied in multiple settings. Comprehensive yet accessible, it is essential reading for researchers and advanced students in disciplines such as Linguistics, Sociology, Anthropology, Communication, and Psychology.
