*Smart Sanctions* David Cortright, George A. Lopez, 2002 *Smart Sanctions* explores the emerging concept of targeted sanctions and provides a comprehensive framework for new sanctions strategies for the 21st century. **Handbook of Defense Economics** Todd Sandler, Keith Hartley, 2007-04-12 The second volume of the *Handbook of Defense Economics* addresses defense needs, practices, threats, and policies in the modern era of globalization. This new era concerns the enhanced cross-border flows of all kinds, e.g., capital and labor flows, revolutionary rhetoric, guerrillas, and terrorists, including the spillovers of benefits and costs associated with public goods and transnational externalities, i.e., uncompensated interdependencies affecting two or more nations. These ever-increasing flows mean that military armaments and armies are less able to keep out security threats. Thus, novel defense and security barriers are needed to protect borders that are porous to terrorists, pollutants, political upheavals, and conflicts. Even increased trade and financial flows imply novel security challenges and defenses. Globalization also underscores the importance of a new set of institutions, e.g., the European Union and global governance networks and agents, e.g., nongovernmental organizations and partnerships. This volume addresses the security challenges in this age of globalization where conflicts involve novel tactics, new technologies, asymmetric warfare, different venues, and frightening weapons. Volume 2 contains topics not covered in volume 1, i.e., civil wars, peacekeeping, economic sanctions, the econometrics of arms races, conversion, peace economics, and the interface of trade, peace, and democracy. Volume 2 also revisits topics from volume 1 where there has been a significant advancement of knowledge, i.e., conflict analysis, terrorism, arms races, arms trade, military manpower, and arms industries. All of the main security concerns of today are analyzed. Chapters are written by the leading contributors in the topic areas. Up-to-date surveys on the pressing defense issues, theoretical, empirical, and policy issues. Coverage of theoretical and empirical studies of terrorism. Contributions by the leading researchers in the field of defense economics.

*Rethinking Security Governance* Christopher Daase, Cornelius Friesendorf, 2010-05-04 This book explores the unintended consequences of security governance actions and explores how their effects can be limited. Security governance describes new modes of security policy that differ from traditional approaches to national and international security. While traditional security policy used to be the exclusive domain of states and aimed at military defense, security governance is performed by multiple actors and is intended to create a global environment of security for states, social groups, and individuals. By pooling the strength and expertise of states, international organizations, and private actors, security governance is seen to provide more effective and efficient means to cope with today's security risks. Generally, security governance is assumed to be a good thing and the most appropriate way of coping with contemporary security problems. This assumption has led scholars to neglect an important phenomenon: unintended consequences. While unintended consequences do not need

to be negative often they are The CIA term blowback for example refers to the phenomenon that a long nurtured group may turn against its sponsor The rise of al Qaeda which had benefited from US Cold War policies is only one example Raising awareness about unwanted and even paradoxical policy outcomes and suggesting ways of avoiding damage or limiting their scale this book will be of much interest to students of security governance risk management international security and IR Christopher Daase is Professor at the Goethe University Frankfurt and head of the research department International Organizations and International Law at the Peace Research Institute Frankfurt PRIF HSFK Cornelius Friesendorf is lecturer at the Goethe University Frankfurt and research fellow at the Peace Research Institute Frankfurt PRIF HSFK

Schrijver,Niels M. Blokker,2020-01-13 Conventional wisdom has it that the successful functioning of the UN Security Council almost completely depends on the role played by its five permanent members and the extent to which they can agree or avoid to fundamentally disagree on the many issues on the Council s agenda But the Council also consists of ten non permanent or elected members who represent five different regions of the world and who though not vested with the right of veto play an indispensable role in Council decision making This book aims to take a closer look at that role It considers what role is foreseen for the elected members in the UN Charter how this evolved in practice and what tools they can deploy It also considers whether there are particular niches for the elected members on the Security Council such as engaging in conflict prevention taking initiatives on rule of law issues and debating the potential effects of climate change on peace and security Can elected members serve as agents of the international community and norm entrepreneurs Should their position be strengthened and if so how This collection was born out of a dynamic research seminar held at Leiden University which also drew on the experiences of former elected members This book thus offers unique insights from both practice and scholarship and is an indispensable tool for politicians diplomats academics and students alike
