book explores societal vulnerabilities highlighted within cinema and develops an interpretive framework for understanding
the depiction of societal responses to epidemic disease outbreaks across cinematic history Drawing on a large database of
twentieth and twenty first century films depicting epidemics the study looks into issues including trust distrust and mistrust
different epidemic experiences down the lines of expertise gender and wealth and the difficulties in visualizing the invisible
pathogen on screen The authors argue that epidemics have long been presented in cinema as forming a point of cohesion for
the communities portrayed as individuals and groups from below represented as characters in these films find solidarity in
battling a common enemy of elite institutions and authority figures Throughout the book a central question is also posed
cohesion for whom which sheds light on the fortunes of those characters that are excluded from these expressions of
collective solidarity This book is a valuable reference for scholars and students of film studies and visual studies as well as
academic and general readers interested in topics of films and history and disease and society The Open Access version of
