International Arms Transfers and the Middle East Ian Anthony, Peter Jones, 1998-11-19 The end of the Cold War and the relentless pace of technological change are altering the patterns of international arms transfers For a number of economic and technological reasons the US is becoming increasingly dominant particularly with respect to the very highest military capabilities which these technologies promise though this will not be without dislocations for the Israeli military and society Other countries such as Iran Iraq and Saudi Arabia may acquire some additional conventional capabilities but they

are not likely to be decisive in relation to Israel though they could increase tensions associated with other disputes in the region Finally in the absence of progress towards a resolution of the Arab Israeli and other regional disputes Israel's increasing technological edge will likely have the effect of further encouraging the efforts of some countries to explore asymmetric responses such as acquiring non conventional weapons or resorting to terrorism

The Weapons Legacy of the Cold War Dietrich Schroeer, Alessandro Pascolini, 2019-01-15 First published in 1997 this volume builds its discussion on a technological base along with policy implications and constitutes a review of the current situation in international security created by the Cold War and how the end of the Cold War is likely to change the situation As the close of the Cold War created a multitude of changes in international security resulting in a broad range of topics tackled in this collection It features specialists in military technology physics political science public and international affairs

Hard Choices Jonathan Moore, 1998-11-19 Since Somalia the international community has found itself changing its view of humanitarian intervention Operations designed to alleviate suffering and achieve peace sometimes produce damaging results The United Nations nongovernmental organizations military and civilian agencies alike find themselves in the midst of confusion and weakness where what they seek are clarity and stability Competing needs rights and values can obscure even the best international efforts to quell violence and assuage crises of poverty More attention must be paid to the complexity of issues and moral dilemmas involved This volume of original essays by international policy leaders practitioners and scholars brings together insights into the conflicting moral pressures present in different kinds of interventions ranging from Rwanda and Somalia to Haiti Cambodia and Bosnia From their various cultural and professional perspectives the authors cover issues of human rights sanctions arms trade refugees HIV and the media Together they make the case that although there are no easy answers moral reflection and content can improve the quality of decisionmaking and intervention in internal conflicts Published under the auspices of The International Committee of the Red Cross

The Barcelona Process George Joffe, Alvaro Vasconcelos, 2014-04-08 The Euro Mediterranean Partnership the Barcelona Process aims to create integration in the Mediterranean Basin so as to encourage economic development along the Southern rim This volume takes a critical look at the problems faced by the Process and the likelihood of its success

Nation States as Schizophrenics Roberta N. Haar, 2001-05-30 The demise of the Cold War continues to pose new challenges to the international system Central to these challenges is the extent of German and Japanese security commitments within their regions and to the global maintenance of peace and stability It is important to know whether two of the world's acknowledged economic powers will play significant stabilizing roles If they choose not to what are the reasons and what can be done to convince them that their military might and political leadership are critical Certainly in the first decade since the end of the Cold War Germany and Japan did not fulfill the roles that their allies and many realist scholars expected they would Haar seeks to explain German and Japanese reticence to assume their anticipated roles In order to undertake this task she evaluates various models of foreign policy In

the future Haar asserts Japanese and German foreign policy are likely to remain torn with both practicing a have it all ways policy If their allies the United States in particular continue to insist that they bear more of the burdens of world security then their foreign policy must be better understood This is a provocative analysis that will be of particular interest to scholars researchers and policy makers involved with German and Japanese foreign policy analysis Fighting for Rights Tal Dingott Alkopher, 2016-04-15 In the light of NATO's humanitarian war in Kosovo is it possible to understand or explain wars as an outcome of perceptions of rights How did rights be they divine rights in the Middle Ages territorial rights in the eighteenth century or human rights today become something that people are willing to fight and die for To answer these questions this book explores the linkage between concepts of rights and the practice of war in the international arena Alkopher describes how normative structures of rights have shaped different practices of war from medieval to modern times through the lens of social constructivism From the eleventh to the thirteenth century concepts of divine rights and institutionalized practices of the Crusades to the Holy Land fostered the prevailing ideas of international rights and war In the eighteenth century the institutionalization of states rights and territorial wars shaped international conflict This view held until the late twentieth century when the institutionalization of human rights coupled with the emerging practice of humanitarian war particularly NATO's war in Kosovo engendered new norms of international conduct The author concludes that rights have the power to constitute an international order that will be either cooperative or conflictual and the choice of outcome is very much in our hands This book will be essential reading for international relations and political science scholars and students but also philosophers legal and sociological historians and international lawyers
