Small Towns In Multilevel Society:

Small Towns in Multilevel Society Frank Wilbur Young, 1999 Small Towns in Multilevel Society introduces an original non economic explanation of how small communities work and how their structure determines the well being of residents It then tests the main proposition using an inexpensive comparative technique to develop a sociological theory and methods package that can be applied anywhere in the world Frank W Young uses data from seventy six towns in five New York counties to test his main propositions as a reply to central place theory and class analysis The author explains that differentiation pluralism and solidarity interact with the mostly economic transaction organizations that do the daily work of the community to determine the average quality of life of the residents Young argues that economic theory takes a secondary role in this assessment His study sets high standards that allow for the systematic comparison of small communities and the correct identification of the multiple levels of structure creating a clear picture of the actual well being of residents in small communities

Population Change and Rural Society William A. Kandel, David L. Brown, 2006-10-12

CALVIN L BEALE In considering how to introduce the subject of rural population change in st the 21 Century I nd myself re ecting on my own experience as a demographer for the U S Department of Agriculture When I arrived at the Department the post World War II modernization of farming was well under way Each year my colleague Gladys Bowles and I had the unpopular task of announcing how much the farm population had decreased in the prior year It was hard to say that the phenomenon was someone's fault Dramatic reductions in labor requirements per unit of agricultural output were occurring everywhere and not just in the United States But politically blame had to be assigned and whichever political party was not in the White House was certain to place the blame squarely on the current administration The demographic consequences of this trend were major In a 22 year period from 1941 to 1962 the net loss of farm population from migration and cessation of farming averaged over a million people per year It took eight years after the war before an administration was willing to begin to talk about the need to diversify rural employment By that time farm residents had already become a minority of rural people However well into the 1970s I continued to receive inquiries from people who still equated rural with farm or who could not envision what rural nonfarm people did for a living

Small Towns and Decentralisation in India Rémi de Bercegol, 2016-09-29 This book examines the impact that decentralisation reforms initiated in the early 1990s have had on small towns in India It specifically focuses on small towns in Uttar Pradesh one of the most densely populated and poorest states in India Although considered home to one of the oldest urban civilisations India remains one of the least urbanised regions in the world At the same time the country has many million strong metropolises that are among the world's largest megacities as well as a multitude of small and medium sized towns and cities This paradoxical urbanisation against a backdrop of reforms has interested the scientific community to gain a more nuanced understanding of the changes and challenges involved This book analyses an urban environment often overlooked by researchers and public authorities namely that of small towns These towns are of vital importance as this is where the bulk of future urban development will take place However decades after implementation of the reforms the majority of reviews and assessments have focused on large cities and so the impacts of the reform on small towns are still poorly understood This book includes extensive primary data about political technical and financial municipal issues in small towns of northern India and is therefore of interest to students researchers and planners working on urban and regional studies in the global South

In Gotham's Shadow Alexander R. Thomas, 2012-02-01 In what may be the first explicitly comparative

study of the effects of globalization on metropolitan and rural communities In Gotham s Shadow examines how three central New York communities struggled over the last half century to survive in a global economy that seems to have forgotten them Utica formerly a city of one hundred thousand experienced the same trends of suburbanization deindustrialization and urban renewal as nearly every American city with the same mixed results In Cooperstown and Hartwick two small villages forty miles south of Utica the same trends were at work though with different outcomes Hartwick may be seen as an example of how small towns have lost their core while Cooperstown may be seen as an example of how a small town can survive by transforming itself into a tourist destination Thomas provides extensive historical background mixed with newspaper excerpts and lively interviews that add a human dimension to the transformations these communities have experienced
