Weinstock, 2019-03-04 Canada has become the first G7 country to legalize cannabis and the world is watching The primary concern facing the Liberal government as it seeks to fulfill its 2015 campaign promise to legalize regulate and restrict access to marijuana is whether it can be done without making the situation worse As the Liberal platform pointed out the current regime lets illegal cannabis fall into the hands of minors pours large profits into organized crime and traps many people in the criminal justice system for what is arguably a victimless crime While the legalization of marijuana in Canada begins with a straightforward change of the criminal code its ramifications go far beyond this Legalization will have a serious impact on the country's international treaty commitments interprovincial relations taxation and regulatory regimes and social and health policies The essays in this book address these outcomes from three main perspectives the decades long political path to legalization the assumptions that underwrite the new policy in particular the desire to stamp out the black market and how legalization in Canada looks in an international context Bringing together analysis by policy makers and scholars including the architect of marijuana

legislation in Portugal a trailblazing jurisdiction High Time provides an urgent and necessary overview of Canada's Cannabis Act *Lobbyists, Governments and Public Trust, Volume 1 Increasing Transparency through Legislation* OECD, 2009-12-01 This report reviews the experiences of Australia Canada Hungary Poland the United Kingdom and the United States with government regulations designed to increase scrutiny for lobbying and lobbyists **Tobacco Control and Tobacco Farming** Wardie Leppan, Natacha Lecours, Daniel Buckles, 2014-09-15 The bulk of the world's tobacco is produced in low and middle income countries In order to dissuade these countries from implementing policies aimed at curbing tobacco consumption such as increased taxes health warnings advertising bans and smoke free environments the tobacco industry claims that tobacco farmers will be negatively affected and that no viable sustainable alternatives exist This book based on original research from three continents exposes the myths behind these claims Drug Use Richard Isralowitz, 2004-05-14 A balanced and straightforward survey of the key issues facts and controversies surrounding the use and abuse of harmful drugs in the United States and abroad Drug Use A Reference Handbook presents a vast collection of facts and information about the major issues that drive the world's never ending drug problem An examination of five substances tobacco alcohol cannabis heroin and cocaine presents eye opening facts about their relationship to politics policies big business and war Historical overviews and descriptions of the makeup and effects of each drug such as the derivation of heroin from the opium poppy segue into an analysis of the risk factors patterns and controversies regarding their use Biographies profile key players related to the substance use problem and reports on drug use in the United States and selected countries are viewed from a worldwide perspective offering a thought provoking exploration of drug use its problems and policies Golden Holocaust Robert N. Proctor, 2012-02-28 The cigarette is the deadliest artifact in the history of human civilization It is also one of the most beguiling thanks to more than a century of manipulation at the hands of tobacco industry chemists In Golden Holocaust Robert N Proctor draws on reams of formerly secret industry documents to explore how the cigarette came to be the most widely used drug on the planet with six trillion sticks sold per year He paints a harrowing picture of tobacco manufacturers conspiring to block the recognition of tobacco cancer hazards even as they ensnare legions of scientists and politicians in a web of denial Proctor tells heretofore untold stories of fraud and subterfuge and he makes the strongest case to date for a simple yet ambitious remedy a ban on the manufacture and sale of cigarettes **Racing to the Bottom?** Kathryn Harrison, 2011-11-01 The spectre of a race to the bottom is increasingly prominent in debates about globalization and also within federal systems where the mobility of both capital and individuals prompts fears of interjurisdictional competition with respect to taxes and environmental and welfare standards While there has been no shortage of either political rhetoric or academic theorizing on this subject empirical studies have been in shorter supply This volume seeks to fill that gap by asking Are Canadian provinces engaged in a race to the bottom and if so what are the consequences The contributors apply insights from economics and political science to several policy fields What emerges is a theoretical and

empirical picture of interprovincial competition that shows it to be more complex than the popular image of a race to the bottom and that also contradicts predictions of an inexorable downward spiral This timely practical volume will be of interest to public policy practitioners as well as to students and scholars of economics and political science *Tobacco Control Legislation* D.
