

SMOKING

RISK, PERCEPTION, & POLICY

"This important book reveals why the young start smoking and why, as adults, they regret having started. It is a great contribution to helping end a national epidemic."

—Cheryl Heaton, Dr. P.H., President / CEO, American Legacy Foundation

Smoking Risk Perception And Policy:

Smoking Paul Slovic, 2001-05-23 This book presents a counter view based on a survey of several thousand young persons and adults probing attitudes beliefs feelings and perceptions of risk associated with smoking The authors agree that young smokers give little or no thought to health risks or the problems of addiction The survey data contradicts the model of informed rational choice and underscores the need for aggressive policies to counter tobacco firms marketing and promotional efforts and to restrict youth access to tobacco

Smoking W. Kip Viscusi, 1992 Are the risks of smoking exaggerated Has there been an open and rational discussion about the risks of smoking This book attempts to answer these and many other questions about the subject providing a detailed empirical presentation on smoking behavior as a risky consumer decision Using new empirical data based on several national and regional surveys Viscusi addresses a number of important issues including the sources of information that people have about the risks of smoking the accuracy of their perceptions of the risks associated with smoking and the consistency of smoking decisions with other risky behavior scrutinizing issues such as whether smokers value risk differently than those who wear safety belts Viscusi also looks at the differences in age groups and how they assess these risks based on public information He provides new insight into the degree to which individuals understand smoking risks and take these risks into account in their behavior With its detailed empirical data and its examination of individual decision making processes this work will interest researchers in public health public policy psychology and economics as well as anyone concerned with this important issue

The Feeling of Risk Paul Slovic, 2013-03-07 The Feeling of Risk brings together the work of Paul Slovic one of the world's leading analysts of risk to describe the extension of risk perception research into the first decade of this new century In this collection of important works Paul Slovic explores the conception of risk as feelings and examines the interaction of feeling and cognition in the perception of risk He also examines the elements of knowledge cognitive skill and communication necessary for good decisions in the face of risk The first section of the book looks at the difficulty of understanding risk without an emotional component for example that disaster statistics lack emotion and thus fail to convey the true meaning of disasters and fail to motivate proper action to prevent them The book also highlights other important perspectives on risk arising from cultural worldviews and concerns about specific hazards pertaining to blood transfusion biotechnology prescription drugs smoking terrorism and nanotechnology Following on from The Perception of Risk 2000 this book presents some of the most significant research on risk perception in recent years providing essential lessons for all those involved in risk perception and communication

New Perspectives on Risk Communication Asa Boholm, 2013-12-16 That risk communication ranks high on the policymaking agenda is beyond discussion today The field is a point of intersection of social communication practical management and policy making It covers such diverse activities as to inform and educate the public about risk and risk management in order to influence attitudes and behaviour to act in situations of emergency or crises to aid in decision

making and to assist in conflict resolution Communication has grown into a major concern in current risk governance based on network co ordinated management of public affairs conducted by authorities and companies and is recognized as a key component in the government of risk This is especially salient in policy fields relating to environmental planning and resource management urban planning chemical and food regulation or infrastructure planning development and maintenance This book explores risk communication research with a focus on new theoretical perspectives research findings and applied goals It reflects on a broad range of innovative theoretical perspectives methodological approaches and empirical areas This book was published as a special issue of the Journal of Risk Research

Consumer Perception of Product Risks and

Benefits Gerard Emilien,Rolf Weitkunat, Frank Lüdicke, 2017-03-14 This book reflects the current thinking and research on how consumers perception of product risks and benefits affects their behavior It provides the scientific regulatory and industrial research community with a conceptual and methodological reference point for studies on consumer behavior and marketing The contributions address various aspects of consumer psychology and behavior risk perception and communication marketing research strategies as well as consumer product regulation The book is divided into 4 parts Product risks Perception of product risks and benefits Consumer behavior Regulation and responsibility

Scientific Standards for Studies on Modified Risk Tobacco Products Institute of Medicine, Board on Population Health and Public Health Practice, Committee on Scientific Standards for Studies on Modified Risk Tobacco Products, 2012-04-19 Smoking related diseases kill more Americans than alcohol illegal drugs murder and suicide combined The passage of the Family Smoking Prevention and Tobacco Control Act of 2009 gave the FDA authority to regulate modified risk tobacco products MRTPs tobacco products that are either designed or advertised to reduce harm or the risk of tobacco related disease MRTPs must submit to the FDA scientific evidence to demonstrate the product has the potential to reduce tobacco related harms as compared to conventional tobacco products The IOM identifies minimum standards for scientific studies that an applicant would need to complete to obtain an order to market the product from the FDA

The Psychology of Risk Glynis M. Breakwell, 2014-09-15 Since the first edition of The Psychology of Risk there have been enormous macro economic and socio political changes globally the chaos in the world banking system and the financial crisis and recessions that it presaged the Arab Spring and the revolutionary shifts in power in the Middle East with rippled consequences around the world the development of ever more sophisticated cyber terrorism that can strike the private individual or the nation state with equal ease Amidst these changes in the face of hazard do the psychological models built to explain human reactions to risk still apply Has the research over the last few years resulted in an improvement in our understanding of how people perceive and act in relation to risk In this second edition Professor Dame Breakwell uses illustrations and current examples to address these questions and provide a totally up to the minute review of what is known about the psychology of risk

Clinical Textbook of

Addictive Disorders Richard J. Frances, Sheldon I. Miller, Avram H. Mack, 2011-01-01 This authoritative work comprehensively examines all aspects of addictive disorders and their treatment. Leading researchers and practitioners identify best practices in assessment and diagnosis and provide tools for working with users of specific substances. Issues in working with particular populations including polysubstance abusers, culturally diverse patients, women, and older adults are addressed, and widely used psychosocial and pharmacological treatment approaches are reviewed. An indispensable text for anyone studying or treating these prevalent, challenging disorders, the book describes ways to tailor interventions to each patient's needs while delivering compassionate, evidence-based care. *Nuclear Waste Management, Nuclear Power, and Energy Choices* Michael Greenberg, 2012-08-14 Hundreds of studies have investigated public perceptions and preferences about nuclear power, waste management, and technology. However, there is a clear lack of uniformity in the style, aims, and methods applied. Consequently, the body of results is inconsistent, and it is difficult to isolate relevant patterns or interpretations. *Nuclear Waste Management, Nuclear Power, and Energy Choices: Public Preferences, Perceptions, and Trust* presents a theoretical base for public reactions, then classifies and reviews the large body of surveys carried out over the past decade. Particular focus is placed on residents within 50 miles of US nuclear waste facilities due to the disproportionate presence of nuclear factors in their lives, such as the legacy of nuclear waste disposal and job dependency. The motivations and reasons for their views, such as fear, attraction to the economic benefits, trust of site managers and federal agencies, cultural views, personal history, and demographic attributes of the people, are also considered to provide a balanced and detailed overview. *Nuclear Waste Management, Nuclear Power, and Energy Choices: Public Preferences, Perceptions, and Trust* includes a comprehensive treatment of the theories and literature, and most important, is grounded in surveys in 2005, 2008, 2009, 2010, and 2011, which includes questions considering the impact of Fukushima on US public opinion. By including real-life data alongside the analysis, *Nuclear Waste Management, Nuclear Power, and Energy Choices: Public Preferences, Perceptions, and Trust* provides a relevant and concise reference for nuclear industry professionals. It also acts as a resource for students and researchers studying nuclear-related topics, including political, social, and environmental factors.
