Beautifully observed and eloquently written Stager's narrative is filled with strange and enchanting details about these submerged worlds diving insects chirping underwater like crickets African crater lakes that explode and the growing threats to some of our most precious bodies of water Modern science has demonstrated that humanity is an integral part of nature on this planet so intertwined with it that we have also become an increasingly powerful force of nature in our own right Still Waters reminds us how beautiful complex and vulnerable our lakes are and how more than ever it is essential to protect them
