Terror By Night A Bomber Pilots Story:

Terror by Night Michael Renaut, 1982 A Bomber Pilot's Story Robert P. Neilson, 2016-09-15 Flying a B 17 Flying Fortress with the Fifteenth Air Force out of Foggia Italy Lt George H Neilson describes the harrowing experiences of his twenty eight combat missions as well as the ups and downs of life in the US Army Air Corps from enlistment to discharge 1943-45 Blending selections of his fathers letters to home and memoirs he recorded a half century later with documented background history the younger Neilson tells the saga of the son of a Boston widow as he confronts the rigors of pilot officer training and combat service in the Mediterranean Theater of Operations during the final six months of World War II in Europe George depicts the humorous and mundane sides of army life as well as the terror filled moments during bomb runs over targets in Austria Germany Czechoslovakia Poland Yugoslavia and Austria as anti-aircraft flak bursts battered the aircraft Neilsons daily chronicles juxtapose moments when life and death hung in the balance such as when he landed his crippled Fort in the Adriatic Sea with the unexpected moments of splendor such as when he dined in luxury on the Isle of Capri at a castle owned by the royal family of Italy Flying in formation through clouds so thick that the plane thirty feet off his wing was invisible George received the Distinguished Flying Cross for his ability as a skilled instrument pilot He recounts youthful escapades on duty free hours and the tales of life in Foggias mud bound tent city in the spur of Italy It includes the stirring story of his visit to a field hospital where his brother a captain in the infantry was recovering from a bullet wound incurred in the fighting in the Apennine Mountain campaign Finally the story tells of World War IIs fiery end and how he unknowingly worked on the secret research project to develop the atomic bomb in a lab at MIT before enlistment For the student of history and aviation and its role in the Allied victory over Hitlers nefarious Reich this microhistory will not disappoint

Flying against Fate S. P. MacKenzie, 2017-08-04 During World War II Allied casualty rates in the air were high Of the roughly 125 000 who served as aircrew with Bomber Command 59 423 were killed or missing and presumed killed a fatality rate of 45 5% With odds like that it would be no surprise if there were as few atheists in cockpits as there were in foxholes and indeed many airmen faced their dangerous missions with beliefs and rituals ranging from the traditional to the outlandish Military historian S P MacKenzie considers this phenomenon in *Flying against Fate* a pioneering study of the important role that superstition played in combat flier morale among the Allies in World War II Mining a wealth of documents as well as a trove of published and unpublished memoirs and diaries MacKenzie examines the myriad forms combat fliers superstitions assumed from jinxes to premonitions Most commonly airmen carried amulets or talismans lucky boots or a stuffed toy a coin whose year numbers added up to thirteen counterintuitively a boomerang Some performed rituals or avoided other acts e g having a photo taken before a flight Whatever seemed to work was worth sticking with and a heightened risk often meant an upsurge in superstitious thought and behavior MacKenzie delves into behavior analysis studies to help explain the psychology behind much of the behavior he documents not slighting the large cohort of crew

members and commanders who demurred He also looks into the ways in which superstitious behavior was tolerated or even encouraged by those in command who saw it as a means of buttressing morale The first in depth exploration of just how varied and deeply felt superstitious beliefs were to tens of thousands of combat fliers Flying against Fate expands our understanding of a major aspect of the psychology of war in the air and of World War II **Battle of Berlin** Martin W Bowman,2020-05-30 The Battle of Berlin the bombing of the Big City as it was known to the crews of RAF Bomber Command raged from 18 November 1943 to the end of the war in Europe in 1945 It is recalled here both by those in the air over capital of the Third Reich as well as those who suffered under the bombing onslaught At the start of the Battle of Berlin Sir Arthur Harris had predicted that the Big City would cost between 400 500 aircraft but that it would also cost Germany the war He was proved wrong on both counts Berlin was not wrecked from end to end as Harris predicted on 3 November 1943 if the USAAF will come in on it although a considerable part of it was destroyed And the Main Battle of Berlin did not cost Germany the war a grinding land campaign had yet to be fought More than 9 000 bombing sorties were flown during the battle on round trips of about 1 200 miles to Berlin and back Berlin was bombed by four Allied air forces between 1940 and 1945 British bombers alone dropped 45 517 tons of bombs whilst the Americans a further 23 000 tons By 1944 some 1 2 million people 790 000 of them women and children about a quarter of Berlin s population had been evacuated to rural areas An effort was made to evacuate all children from Berlin but this was defeated by parents and many evacuees who soon made their way back to the city However by May 1945 1 7 million people 40% of the population had fled the city This fitting tribute to those who died in the relentless struggle to knock Berlin and hopefully Germany out of the war resonates with eyewitness accounts and background information which the author has painstakingly investigated and researched The result is a hugely fascinating and highly readable narrative containing very real and unique observations by British and Commonwealth aircrew and equally importantly the long suffering citizens of Berlin and well as the capital s defenders Up to the end of March 1945 there had been a total of 314 air raids on Berlin eighty five of these in the last twelve months Estimates of the total number of dead in Berlin from air raids range from 20 000 to 50 000 the relatively low casualty figure in Berlin is partly the result of the city s formidable air defenses and shelters The Battle of Berlin was not a defeat in absolute terms but in the operational sense it was an offensive that Air Marshal Sir Arthur Harris and his aircrews could not win Berlin won concluded Sir Ralph Cochrane the Air Officer Commanding 5 Group RAF Bomber Command It was just too tough a nut The Veterans' Tale Frances Houghton,2019-01-10 This is a unique account of the ways in which British veterans of the Second World War remembered understood and recounted their experiences of battle throughout the post war period Focusing on themes of landscape weaponry the enemy and comradeship Frances Houghton examines the imagery and language used by war memoirists to reconstruct and review both their experiences of battle and their sense of wartime self Houghton also identifies how veterans memoirs became significant sites of contest as former servicemen sought to challenge what they saw

as unsatisfactory official scholarly and cultural representations of the Second World War in Britain Her findings show that these memoirs are equally important both for the new light they shed on the memory and meanings of wartime military experience among British veterans and for what they tell us about the cultural identity of military life writing in post war British society *BRITISH WAR FILMS, 1939 - 45* S. Journal ,1983 *Diary of a Night Bomber Pilot in World War I* Clive Semple,2008-03-28 Flying at 18 demobbed at 20 Semple's astonishing experience has been meticulously put into context How do you fly a Handley Page across France in total darkness The answer is the Lighthouse system just one of the revelations in this unique record of ingenuity and courage

The RAF's Youngest Bomber Pilot of WW2 Graham Waterton,2024-08-30 Having left his grammar school just before his 16th birthday Brian Slade falsified his age to pursue his dream of becoming a pilot Within a few days of his 17th birthday he was awarded his wings It was the start of this teenager's remarkable wartime career Soon after being awarded his pilot's brevet Brian was posted to his first squadron Flying the venerable Vickers Wellington he found himself experimenting with early target marking techniques It was also there that Brian gained the nickname The Boy Slade Though Brian's journey through the wartime RAF mirrored the experiences of tens of thousands of young men what was different if not unique was the fact before he had turned 18 which was the minimum age to begin aircrew training Brian had already completed thirty four operations more than was needed for a tour This tally included the three 1 000 bomber raids against Cologne Essen and Bremen He was awarded a Distinguished Flying Cross for nursing his badly damaged Wellington which sustained flak and night fighter damage home after a raid on Bremen Undaunted Brian soon after volunteered for his second tour of operations It was at this stage that he joined the Lancaster equipped 83 Squadron in the newly formed 8 Group becoming an experienced Pathfinder skipper It was a role in which he marked targets in the Battle of the Ruhr the bombing of Hamburg Operation Gomorrah and the Peenemünde raid The RAF's Youngest Bomber Pilot of WW2 told by his nephew a former officer in the British Army details all of Brian's fifty nine missions and captures his compelling progress with Bomber Command

alongside the technological advances in aircraft pathfinder strategy and tactics Sadly Brian s Lancaster was shot down over Berlin in August 1943 The details of its loss remained shrouded in mystery until the puzzle of his aircraft s demise was eventually solved by tracing the family of the only survivor The relent less dangers not just in operations but also in training and the continuous loss of life are drawn into sharp focus But on account of his age Brian s story is unique There may have never been nor will ever be an RAF pilot of 19 years old with his flying and operational experience Complemented with a collection of previously unpublished photographs The RAF s Youngest Bomber Pilot of WW2 is one of the Second World War s most amazing tales
