Electronic Trading And Blockchain: Yesterday, Today And Tomorrow Richard L. Sandor, 2018-04-19. Trading floors in the 60s and 70s involved hundreds of people shouting bids and offers in multi-coloured jackets standing next to each other in different pits, gesticulating with their hands. The decibel levels were extremely high, so high that traders who traded every day had hearing problems later in life. In 1980, the first widely used electronic trading exchange was established. On September 1, 1969, the California Commodity Advisory Research Project (CCARP) was formed and housed at UC Berkeley. The project's first aim was to examine the feasibility of an electronic for-profit exchange. At the time, there were only 12 exchanges worldwide, and none were for-profit or electronic. Read first-hand from Richard Sandor, the project director, and how CCARP was 20 years too early for the financial world.

Africa Yesterday, Today and Tomorrow Nathan Andrews, 2013-02-14. From a multi-dimensional and interdisciplinary standpoint, this book challenges the teleological and unidirectional notions of development embodied in the idea of modernisation or progress and offers a critique of the tendency to consider Africa as a basket case, which often gives the Western self an undeserving privilege and superiority over the African other. Mostly authored by emerging African scholars, this 16-chapter volume addresses the historical application of development projects in Africa and their modern impact in economic, political, cultural, social, and infrastructural contexts, among others. The book therefore unearths development dynamics in specific African countries, examines the continent's external relations, rethinks predominant ideas on development, and engages in critical examination of concepts and practices that have maintained hegemonic positions in the discussions on Africa's development. Its uniqueness lies in the ability to bring these several voices and themes together into a concise conception of both the challenges and possibilities of Africa's sustainable development. The book targets both the academic and policy worlds in Africa and around the world, as well as ordinary members of the public who seek to broaden their theoretical and empirical understanding on the changing dynamics on the African continent.
