Text Mining Methods For Analysing Unstructured Information:

Text Mining Sholom M. Weiss, Nitin Indurkha, Tong Zhang, Fred Damerau, 2010-01-08 Data mining is a mature technology. The prediction problem looking for predictive patterns in data has been widely studied. Strong methods are available to the practitioner. These methods process structured numerical information where uniform measurements are taken over a sample of data. Text is often described as unstructured information. So it would seem text and numerical data are different requiring different methods. Or are they? In our view a prediction problem can be solved by the same methods whether the data are structured numerical measurements or unstructured text. Text and documents can be transformed into measured values such as the presence or absence of words and the same methods that have proven successful for predictive data mining can be applied to text. Yet there are key differences. Evaluation techniques must be adapted to the chronological order of publication and to alternative measures of error. Because the data are documents more specialized analytical methods may be preferred for text. Moreover the methods must be modified to accommodate very high dimensions: tens of thousands of words and documents. Still the central themes are similar.

Text Mining Sholom M. Weiss, 2005 Overview of text mining. From textual information to numerical vectors. Using text for prediction. Information retrieval and text mining. Finding structure in a document collection looking for information in documents. Case studies. Emerging directions. Appendix. Software notes.

Text Mining and Analysis Dr. Goutam Chakraborty, Murali Pagolu, Satish Garla, 2014-11-22 Big data. It's unstructured, it's coming at you fast and there's lots of it. In fact the majority of big data is text oriented thanks to the proliferation of online sources such as blogs, emails and social media. However having big data means little if you can't leverage it with analytics. Now you can explore the large volumes of unstructured text data that your organization has collected with Text Mining and Analysis. Practical Methods, Examples and Case Studies Using SAS. This hands-on guide to text analytics using SAS provides detailed step-by-step instructions and explanations on how to mine your text data for valuable insight. Through its comprehensive approach you'll learn not just how to analyze your data but how to collect, cleanse, organize, categorize, explore and interpret it as well. Text Mining and Analysis also features an extensive set of case studies so you can see examples of how the applications work with real-world data from a variety of industries. Text analytics enables you to gain insights about your customers' behaviors and sentiments. Leverage your organization's text data and use those insights for making better business decisions with Text Mining and Analysis. This book is part of the SAS Press program.

Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications Gary D. Miner, John Elder, Andrew Fast, Thomas Hill, Robert Nisbet, Dursun Delen, 2012-01-25 Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications brings together all the information tools and methods a professional will need to efficiently use text mining applications and statistical analysis. Winner of a 2012 PROSE Award in Computing and Information Sciences from the Association of American Publishers, this book presents a comprehensive how-to reference that shows the

user how to conduct text mining and statistically analyze results In addition to providing an in depth examination of core text mining and link detection tools methods and operations the book examines advanced preprocessing techniques knowledge representation considerations and visualization approaches Finally the book explores current real world mission critical applications of text mining and link detection using real world example tutorials in such varied fields as corporate finance business intelligence genomics research and counterterrorism activities The world contains an unimaginably vast amount of digital information which is getting ever vaster ever more rapidly This makes it possible to do many things that previously could not be done spot business trends prevent diseases combat crime and so on Managed well the textual data can be used to unlock new sources of economic value provide fresh insights into science and hold governments to account As the Internet expands and our natural capacity to process the unstructured text that it contains diminishes the value of text mining for information retrieval and search will increase dramatically Extensive case studies most in a tutorial format allow the reader to click through the example using a software program thus learning to conduct text mining analyses in the most rapid manner of learning possible Numerous examples tutorials power points and datasets available via companion website on Elsevierdirect com Glossary of text mining terms provided in the appendix
