Text Theory:

Text, Theory, Space Kate Darian-Smith, Liz Gunner, Sarah Nuttall, 2005-08-04 Text Theory Space is a landmark in post colonial criticism and theory Focusing on two white settler societies South Africa and Australia the contributors investigate the meaning of the South as an aesthetic political geographical and cultural space Drawing upon a wide range of disciplines which include literature history urban and cultural geography politics and anthropology the contributors examine crucial issues including defining what the South encompasses investigating ideas of space history land and landscape claiming naming and possessing land national and personal boundaries questions of race gender and nationalism Recent Trends in Meaning-text Theory Leo Wanner, 1997-01-01 The present volume contains articles of well known representatives of the Meaning Text Theory MTT and other related linguistic theories Founded by I Mel'cuk and A Zholkovsky in the sixties in Moscow MTT soon became known in the West as a prominent outsider theory The picture changed since then though MTT gained importance in several areas of linguistics and computational linguistics It influenced the design of new grammar formalisms such as Dependency Tree Grammars Also specific parts of MTT have been directly overtaken into other theories consider for example the work on integrating Lexical Functions into Pustejovsky's Generative Lexicon The present volume is a further convincing demonstration of MTT's liveliness and relevance to the field's burning issues The focus of the volume is on semantics semantic representation and relation of semantics to surface in MTT Six out of eight articles Polguere Escalier Paducheva St Germain Beck Bogulavsky deal with problems related to these topics while the last two articles of the volume Sgall and Rambow Joshi throw a bridge between MTT or more precisely between dependency based theories of which MTT is one instantiation and other linguistic theories Computing Attitude and Affect in Text: Theory and Applications James G. Shanahan, Yan Qu, Janyce Wiebe, 2006-01-17 Human Language Technology HLT and Natural Language Processing NLP systems have typically focused on the factual aspect of content analysis Other aspects including pragmatics opinion and style have received much less attention However to achieve an adequate understanding of a text these aspects cannot be ignored The chapters in this book address the aspect of subjective opinion which includes identifying different points of view identifying different emotive dimensions and classifying text by opinion Various conceptual models and computational methods are presented The models explored in this book include the following distinguishing attitudes from simple factual assertions distinguishing between the author's reports from reports of other people's opinions and distinguishing between explicitly and implicitly stated attitudes In addition many applications are described that promise to benefit from the ability to understand attitudes and affect including indexing and retrieval of documents by opinion automatic question answering about opinions analysis of sentiment in the media and in discussion groups about consumer products political issues etc brand and reputation management discovering and predicting consumer and voting trends analyzing client discourse in therapy and counseling determining relations between scientific texts by finding reasons for citations generating more

appropriate texts and making agents more believable and creating writers aids The studies reported here are carried out on different languages such as English French Japanese and Portuguese Difficult challenges remain however It can be argued that analyzing attitude and affect in text is an NLP complete problem

Selected Lexical and Grammatical Issues in the Meaning-text Theory Leo Wanner,Igor? Aleksandrovi? Mel??uk,2007-01-01 The Meaning Text Theory MTT is a lexicon centred and dependency based theory for the description of language using a holistic model that incorporates semantics syntax morphology and lexis This volume prepared on the occasion of Igor Mel cuk s 70th birthday offers a cross section of the current advances in MTT and its applications The first part of the book focuses on lexical phenomena that are still largely neglected in mainstream linguistics sound symbolism as manifested by ideophones and idiosyncratic lexical relations as manifested by lexical functions LFs In particular LFs are addressed from different angles including the introduction of new standard LFs the argument structure and semantic decomposition of lexical relations captured by LFs automatic recognition of LF instances in corpora and the use of LFs in terminology and natural language processing The second part of the book deals with such prominent model oriented issues as semantic paraphrasing in MTT the role of phrase structure in MTT and syntactic analysis within MTT
