Early Republic Ralph D. Gray, Michael A. Morrison, 1994 *Bankrupt Representation and Party System Collapse* Jana Morgan, 2011-11-30 In recent decades Bolivia Colombia Italy and Venezuela have all faced the turmoil and democratic crisis of party system collapse In *Bankrupt Representation and Party System Collapse* Jana Morgan analyzes the causes of such collapse She does so through a detailed examination of Venezuela s traumatic party system decay as well as comparative analysis of seven other countries Collapse occurs when the party system as a whole is unable to provide adequate linkage between society and the state failing to furnish programmatic representation integration of major societal interests or clientelist exchanges Linkage decays when party systems face challenges that jeopardize their core strategies at the same time that they are constrained in their ability to adapt and to confront these threats If this decay is unchecked and linkage of all sorts fails then the bankrupt party system collapses **Agenda Setting, Policies, and Political Systems** Peter

Palau, Luz M. Muñoz Marquez, Martial Foucault, Éric Montpetit, 2020-03-04 What will gain the system s attention Explores the dynamics of a broad range of policy issues in different countries an important scholarly contribution *Political Studies Review* Before making significant policy decisions political actors and parties must first craft an agenda designed to place certain issues at the center of political attention The agenda setting approach in political science holds that the amount of attention devoted by the various actors within a political system to issues like immigration health care and the economy can inform our understanding of its basic patterns and processes While there has been considerable attention to how political systems process issues in the United States Christoffer Green Pedersen and

Stefaan Walgrave demonstrate the broader applicability of this approach by extending it to other countries and their political systems This book brings together essays on eleven countries and two broad themes Contributors to the first section analyze the extent to which party and electoral changes and shifts in the partisan composition of government have led or not led to policy changes in the United States the United Kingdom the Netherlands Denmark Switzerland and France The second section turns the focus on changing institutional structures in Germany Italy Belgium Spain and Canada including the German reunification and the collapse of the Italian party system Together the essays make clear the efficacy of the agenda setting approach for understanding not only how policies evolve but also how political systems function

The Reshaping of West European Party Politics Christoffer Green-Pedersen, 2019-07-31 Long gone are the times when class based political parties with extensive membership dominated politics Instead party politics has become issue based Surprisingly few studies have focused on how the issue content of West European party politics has developed over the past decades Empirically Reshaping of West European Party Politics studies party politics in Belgium Denmark France Germany the Netherlands Sweden and the UK from 1980 and onwards This book highlights the more complex party system agenda with the decline but not disappearance of macroeconomic issues as well as the rise in new politics issues together with education and health care Moreover various new politics issues such as immigration the environment and European integration have seen very different trajectories To explain the development of the individual issues this volume develops a new theoretical model labelled the issue incentive model of party system attention The aim of the model is to explain how much attention issues get throughout the party system which is labelled the party system agenda To explain the development of the party system agenda one needs to focus on the incentives that individual policy issues offer to large mainstream parties i e the typical Social Democratic Christian Democratic or Conservative Liberal parties that have dominated West European governments for decades The core idea of the model is that the incentives that individual policy issues offer to these vote and office seeking parties depend on three factors namely issue characteristics issue ownership and coalition considerations The issue incentive model builds on and develops a top down perspective on which the issue content of party politics is determined by the strategic considerations of political parties and their competition with each other Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Emilie van Haute Professor of Political Science Universit libre de Bruxelles Ferdinand M ller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow John and Rebecca Moores Professor of Political Science University of Houston

Parties and Party Systems Giovanni Sartori, 2014-01-01 In this rich and broad ranging volume Giovanni Sartori outlines what is now recognised to be the most comprehensive and authoritative approach

to the classification of party systems He also offers an extensive review of the concept and rationale of the political party and develops a sharp critique of various spatial models of party competition This is political science at its best combining the intelligent use of theory with sophisticated analytic arguments and grounding all of this on a substantial cross national empirical base *Parties and Party Systems* is one of the classics of postwar political science and is now established as the foremost work in its field

The Founders and the Idea of a National University George Thomas, 2015 *Constituting the American Mind* is about early efforts to establish a national university and what those efforts say about the nature and logic of American Constitutionalism This book offers the first in depth study of the efforts to establish a national university from a constitutional perspective While mostly noted in passing the national university was put forward by every president from Washington to John Quincy Adams as a necessary supplement to the formal institutions of government it would help constitute the American mind in a manner that carried forward the ideas the constitution rested on including for example the separation of the civic from the theological

Rethinking Party Systems in the Third Wave of Democratization Scott Mainwaring, 1999 Based on an in depth examination of the Brazilian case this book argues that we need to rethink important theoretical issues and empirical realities of party systems in the third wave of democratization

The Idea of Political Marketing Nicholas O. O'Shaughnessy, Stephan C.M. Henneberg, 2002-06-30 O'Shaughnessy Henneberg and their contributors examine how the theory and practice of marketing has been and can be applied to politics Particular attention was paid to the theory of political marketing with conceptual definitions developed to better facilitate communication between marketing professionals and political science researchers Political marketing is about the making and unmaking of governments in a democracy Despite its growing importance the marketing academic profession has shown very little interest in the political ramifications of their discipline while political scientists often come to political marketing with the view that it is cosmetic if not trivial O'Shaughnessy Henneberg and their contributors examine how the theory and practice of marketing has been and can be applied to politics As they show elections are a persuasion task writ large most especially with the demise of inherited class loyalties Following elections governments can employ marketing techniques to build support for their actions while opposition parties can press the government and its supporters through similar marketing approaches Of particular interest to scholars researchers and policy makers involved with politics political communication and the making of public policy
