The Idea Of Perfection

R. Newton Flew

The Idea Of Perfection:

The Idea of Perfection in Christian Theology R. Newton Flew, 2005-03-02 This book is an examination of historical Christian teaching relating to the perfection of the soul It begins with the New Testament and with the recorded teaching of Christ which contemplated for his disciples a life lived on the level of miracle The rest of the book is concerned to trace the history of this idea of perfection in the history of the historic church first in the writings of St Paul and St John then in the Fathers in the ideal of Monastic life through Augustine and St Thomas Aquinas to the Reformation to St Francis de Sales Fanelon Law the Quakers and the Methodists and on to the present day

The Idea of Perfection in the Modern World Martin Foss, 1946 The Sovereignty of Good Over Other Concepts Iris Murdoch, 2001 First Published in 1970 Routledge is an imprint of Taylor Francis an informa company A Reevaluation of the Idea of Perfection William Henry Harris, 1953

The Idea of Perfection in the Western World Martin Foss, 1946 **The Intelligible World** James Lawler, 2014-09-26 Understanding Kant's pre critical philosophy is central to appreciating his three critiques Overshadowed by the critiques the early work stands on its own as a central contribution to the development of the philosophy of its time In addition it not only prepares the way for the critiques but constitutes a hidden background without which they cannot be adequately understood Here we find Kant's great cosmology which is what Kant later regarded as the thing in itself persisting behind his notions of the noumenon the intelligible world and the postulates of morality Although he finally decided that his grand cosmological vision could not be demonstrated what cannot be strictly known can still be conjectured justifiably believed or postulated Kant's only possible proof for the existence of God remains implicit in the first critique The only writer about whom Kant ever dedicated a major work *Dreams of a Spirit Seer* Elucidated by *Dreams of Metaphysics* was Emanuel Swedenborg Kant here explores a conjectural metaphysics of matter and spirit and further formulates the meaning of the intelligible world providing the ontological framework of his later ethics If only one of Swedenborg's documented spirit seeings was valid how feeble must the metaphysical dreams of philosophers themselves seem

The Invention and Reinventions of Methodism Andrew J. Cheatle, 2025-03-06 This book focuses on the transformative journey of Methodism and tackles a profound question How did a radical revival movement evolve into an established mainstream Church With a global family of around eighty million Methodism and its Holiness offshoots have come a long way since their origins as a fervent revival within the Church of England in the late 1730s Once perceived as controversial and charismatic early Methodists led by John and Charles Wesley preached salvation to unruly crowds often facing fierce opposition Despite its turbulent beginnings the Wesleys skilfully kept the movement anchored to its Anglican roots preventing it from fracturing entirely This allowed Methodism to evolve into an established church while maintaining its distinct identity The volume delves into the enduring legacy of early Methodism exploring its theological influences and developments over time With its identity wrapped up in dual focus on mission and holiness Methodism's impact on global Christianity is profound From the

Holiness movement to the rise of Pentecostalism its early radical and charismatic practices still resonate in the Church today Featuring essays from leading Wesleyan scholars this book is valuable for anyone interested in the dynamic history and lasting influence of the Methodist tradition The Idea of the Self Jerrold Seigel, 2005-02-17 What is the self The question has preoccupied people in many times and places but nowhere more than in the modern West where it has spawned debates that still resound today In this 2005 book Jerrold Seigel provides an original and penetrating narrative of how major Western European thinkers and writers have confronted the self since the time of Descartes Leibniz and Locke From an approach that is at once theoretical and contextual he examines the way figures in Britain France and Germany have understood whether and how far individuals can achieve coherence and consistency in the face of the inner tensions and external pressures that threaten to divide or overwhelm them He makes clear that recent postmodernist accounts of the self belong firmly to the tradition of Western thinking they have sought to supersede and provides an open ended and persuasive alternative to claims that the modern self is typically egocentric or disengaged *The Concept of Ideals in Legal Theory* Sanne Taekema, 2002-12-31 Talk about law often includes reference to ideals of justice equality or freedom But what do we refer to when we speak about ideals in the context of law This book explores the concept of ideals by combining an investigation of different theories of ideals with a discussion of the role of ideals in law A comparison of the theories of Gustav Radbruch and Philip Selznick leads up to a pragmatist theory of legal ideals which provides an interesting new position in the debate about values in law between legal positivists and natural law thinkers Attention for law s central ideals enables us to understand law s autonomous character while at the same time tracing its connection to societal values Essential reading for anyone interested in the role of values or ideals in law **Adam Ferguson and the Idea of Civil Society** Craig Smith, 2018-11-14 Adam Ferguson a friend of David Hume and Adam Smith was among the leading Scottish Enlightenment figures who worked to develop a science of man He created a methodology for moral science that combined empirically based social theory with normative moralising He was among the first in the English speaking world to make use of the terms civilization civil society and political science Craig Smith explores Ferguson s thought and examines his attempt to develop a genuine moral science and its place in providing a secure basis for the virtuous education of the new elite of Hanoverian Britain The Ferguson that emerges is far from the stereotyped image of a republican sceptical about commercial society and much closer to the mainstream of the Scottish Enlightenment and its defence of the new British commercial order
