The Index Of Scientific Writings On Creativity Creative Men And Women:

The Creativity Question Albert Rothenberg, Carl R. Hausman, 1976 Albert Rothenberg a psychiatrist and Carl R. Hausman a philosopher have prepared a truly comprehensive interdisciplinary book of readings on creativity This group of selections from the works of writers in psychiatry philosophy psychology psychoanalysis and education brings together for the first time major theoretical works outstanding empirical findings and discussions of the definition and nature of creativity The organization of *The Creativity Question* is unique it illustrates the various approaches and basic assumptions underlying studies of creativity throughout the course of history up to the present time The main body of selections appears under the categories of descriptions attempts at explanation and alternate approaches As specific orientations to creativity can be traced to particular initiating thinkers and investigators there is a special chapter on seminal accounts containing selections from the works of Plato Aristotle Kant Galton and Freud Another chapter includes recent illustrations of special types of exploratory trends creativity of women brain research synectics extrasensory perception behaviorism and creativity computer programming This organization highlights the tension between strictly scientific accounts and alternative approaches offering new ways of understanding The editors have provided for the books as a whole and for each chapter explanation and discussion of the basic issues raised by the various approaches to creativity

The Index of Scientific Writings on Creativity Albert Rothenberg, Bette Greenberg, 1975

Creativity and Madness Albert Rothenberg, 1990-09-01 Intrigued by history's list of troubled geniuses Albert Rothenberg investigates how two such opposite conditions outstanding creativity and psychosis could coexist in the same individual Rothenberg concludes that high level creativity transcends the usual modes of logical thought and may even superficially resemble psychosis But he also discovers that all types of creative thinking generally occur in a rational and conscious frame of mind not in a mystically altered or transformed state Far from being the source or the price of creativity Rothenberg discovers psychosis and other forms of mental illness are actually hindrances to creative work Disturbed writers and absent minded professors make great characters in fiction but Rothenberg has uncovered an even better story the virtually infinite creative potential of healthy human beings

The Abyss Above Silke-Maria Weineck, 2012-02-01 In *The Abyss Above* Silke Maria Weineck offers the first sustained discussion of the relationship between poetic madness and philosophy Focusing on the mad poet as a key figure in what Plato called the ancient quarrel between philosophy and poetry Weineck explores key texts from antiquity to modernity in order to understand why we have come to associate art with irrationality She shows that the philosophy of madness concedes to the mad a privilege that continues to haunt the Western dream of reason and that the theory of creative madness always strains the discourse on authenticity pitching the controlled repeatable but restrained labor of philosophy against the spontaneous production of poetic texts said to be by definition unique

Clifford Odets Margaret Brenman-Gibson, 2002 Applause Books Clifford Odets through his plays which include

Waiting for Lefty and Awake and Sing was the champion of the oppressed avenger for the poor. He and his plays as presented by the influential Group Theatre were the conscience of America during the Depression. Author Margaret Brenman Gibson, a respected psychoanalyst and close personal friend, penned what is considered the classic biography of Odets. Based on exhaustive research including access to his personal papers plus her own insights into the man and his career, it is at last back in print. The book is richly annotated with a thorough bibliography, personal chronology, a list of Odets' works published and unpublished, and a section of rare photographs.

Flight from Wonder Albert Rothenberg, 2015. Scientific breakthroughs have had far-reaching social and physical effects on modern civilization, yet until recently there have been relatively few investigations into the nature of scientific creativity itself. Flight from Wonder reports the findings from an empirical study of 42 Nobel laureates in science from the United States and Europe concerning the creative processes that yield scientific innovation. To this end, Albert Rothenberg designed an interview scheme to delineate the content and sequences of processes that lead scientists to specific creative achievements. He conducted interviews with Nobel laureates in the fields of medicine, physiology, physics, and chemistry, while carrying out matching interviews with a control group consisting of twelve accomplished engineers on the faculty of a leading engineering university. Rothenberg's results demonstrate that the Nobel laureates perform three distinct cognitive creative processes to achieve key formulations and discoveries; the detailed nature and structure of these findings were reviewed and corroborated by each of the Nobel laureates. To supplement his findings, Rothenberg engages with autobiographical accounts and work in progress manuscripts pertaining to the creative discoveries of outstanding scientists of the past, including Albert Einstein, Charles Darwin, Max Planck, Niels Bohr, Hideki Yukawa, and James Watson. The book will interest students and general science readers fascinated by the development of scientific inquiry and innovation.

Holland's Guide to Psychoanalytic Psychology and Literature-and-Psychology Norman N.

Holland, 1990-02-15. As psychoanalysis becomes more and more important to literary studies and the accompanying literature bulks larger and larger, students often feel overwhelmed, not knowing where to turn for readings that will open up the subject. Holland's Guide to Psychoanalytic Psychology and Literature and Psychology offers an ingenious solution to this problem. It provides concise outlines of all types of psychoanalytic theory and shows how they apply to literary criticism. The outlines point in turn to further, more specific readings, articles, essays, and books, which can then be located by two extensive bibliographies that follow the discussion. These offer materials that range from the earliest Freud to the latest cognitive science and include dozens of bibliographic aids. Holland integrates these suggested readings with lively, detailed comments on various psychologies as they relate to literature. He is thus able to guide students easily to the precise subject they wish to study, be it Jungian criticism, ego psychology, feminist psychoanalysis, psychoanalytic film theory, or interpretation of some specific text. Holland also offers a bracing discussion of reader response criticism and a lucid guide to the work of Jacques Lacan. A trenchant epilogue defends the psychological approach, suggesting which points in psychoanalytic theory will work.

for literary critics and which will not The only such guidebook for students of psychoanalytic literary theory and literary criticism Holland s Guide will also prove an invaluable aid for those studying psychoanalysis and psychology **How to Find Out in Psychology** D. H. Borchardt,R. D. Francis,2013-10-22 How to Find Out in Psychology A Guide to the Literature and Methods of Research is a research guidebook in psychology The book is comprised of 11 chapters that address concerns in psychological research The text first covers the concept of psychology and its major theories and then proceeds to tackling bibliographic aids for research in psychology The next series of chapters details the methodologies in researching and presenting The last chapters discuss the professional matters in psychology The book will be of great use to students researchers and practitioners of behavioral science Visual Arts Reference and Research Guide Elizabeth J.
