The Humanities In The Age Of Science:

Observations on the Status of the Humanities in an Age of Science Hilda Urén Stubbings,1958 **Humanities in the Age of Science** Charles Angoff,1975 The contributors are all outstanding purveyors of what is knowledgeable and dynamic in the realm of education and they have endeavored to set down in writing what is of major interest to them in the areas of art literature history science and religion Written I honor of Dr Peter Sammartino the first president of Fairleigh Dickinson University **The Humanities in an Age of Science. Three Lectures, Etc** John Francis Leddy,1961 *The Humanities in the age of science, in honor of Peter Sammartino, ed ,* **The Human and Humanities in the Age of Globalization** Afis A. Oladosu,Ayobami Ojebode,Adeshina Afolayan,2024-11-03 This volume critically engages with how the idea of the human features in African societies and scholarship From the most established to emergent scholars contributions to this volume examine issues from the funding of the humanities to the relationship between the humanities and national development and from citizenship and spirituality to the idea of the humane environment and a responsible media representation All the contributors are concerned with the urgent imperative of rescuing the human and what it means to be humane in a world being pushed steadily towards a dystopic future by climate change religious fundamentalism racism and academic hubris all contributing to the advancement of humanity to the brink of the precipice **The Concept of Humanity in an Age of Globalization** Longxi Zhang,2011-12-07 Rethinking humanity as a concept in our age of globalization and its relevance to the social and political reality of our times are the topic of this book It calls for the reclaiming of humanism as an effective response to the conflict turmoil and violence we witness in the world today Concepts of humanity and humanism have become suspect of na vet at best and guilty of bad faith and repressive ideologies at worst Yet hope for improvement is incorrigibly human the concept of humanity still holds enormous attraction to intellectuals and humanistic scholars At the same time it is important to realize that the critique of humanism is very much based on and limited to Western social and historical experience To re conceptualize humanity and humanism from a truly global perspective will help reclaiming a more inclusive kind of humanism In this sense a cross cultural perspective is important for reclaiming humanism in our age of globalization The present volume is the result of such an effort The diversity of the authors views speaks eloquently of the complexity of the concept of humanity or what constitutes the distinctly human and therefore the necessity to have an in depth dialogue on the fate of humanity *Philosophy in the Age of Science?* Julia Hermann,Jeroen Hopster,Wouter Kalf,Michael Klenk,2020-06-09 Current academic philosophy is being challenged from several angles Subdisciplinary specialisations often make it challenging to articulate philosophy s relevance for the societal questions of our day Additionally the success of the scientific method puts pressure on philosophers to articulate their methods and specify how these can be successful How does philosophical progress come about What can philosophy contribute to our understanding of today s world Moreover can it also contribute to resolving urgent societal challenges such

as anthropogenic climate change This edited volume evaluates the place of philosophy in the age of science It addresses three related sub themes philosophical progress philosophical method and philosophy s societal relevance Fourteen authors engage with these sub themes focusing on the topics of their philosophical expertise such as the philosophy of religion evolutionary ethics and the nature of free will In doing so they explore their methods of enquiry and look at how progress in their research comes about *Philosophy in an Age of Science* Hilary Putnam,2012-04-17 Hilary Putnam s unceasing self criticism has led to the frequent changes of mind he is famous for but his thinking is also marked by considerable continuity A simultaneous interest in science and ethics unusual in the current climate of contention has long characterized his thought In *Philosophy in an Age of Science* Putnam collects his papers for publication his first volume in almost two decades Mario De Caro and David Macarthur s introduction identifies central themes to help the reader negotiate between Putnam past and Putnam present his critique of logical positivism his enduring aspiration to be realist about rational normativity his anti essentialism about a range of central philosophical notions his reconciliation of the scientific worldview and the humanistic tradition and his movement from reductive scientific naturalism to liberal naturalism Putnam returns here to some of his first enthusiasms in philosophy such as logic mathematics and quantum mechanics The reader is given a glimpse too of ideas currently in development on the subject of perception Putnam s work contributing to a broad range of philosophical inquiry has been said to represent a history of recent philosophy in outline Here it also delineates a possible future **The Age of Science-Tech Universities** Paola Francesca Antonietti,Paola Bertola,Antonio Capone,Bianca Maria Colosimo,Davide Moscatelli,Carolina Pacchi,Stefano Ronchi,2021-12-28 Analysing past and ongoing trends that have shaped the landscape of universities worldwide this book explores the possible paths for the future of universities along three main dimensions characterizing key strategic choices knowledge creation and dissemination relationships within society and governance mechanisms By sharing reflections and offering directions on the changing role of technical universities especially in Europe this book considers the change and disruption that are causing universities to reconsider their role This book provides an up to date picture of the role of technical universities in the European context critically discusses the strengths and weaknesses of technical universities identifies emerging challenges that will shape their evolution going forward provides insight into how current models can be adapted and adopted for future use Impinging on extensive transdisciplinary research this book highlights the need of the technical university within society and its role not only to improve skills but education in the most articulated sense to train future citizens and professionals The book is a must read for all those interested in the future of technical universities **The 48th Golden Age of Science Ficton MEGAPACK®: Robert F.
