The Icarus Complex

Brad Hastings

The Icarus Complex:

The ICARUS Complex Jack H. Bailey, 1972-01-01 *The Icarus Complex* Félix Martí-Ibáñez, 1971 *A Study of the Icarus Complex* LLOYD Hayden Guptill, 1965 *The Icarus Complex* Nils Wiklund, 1978 **Twist of Fate** Brad Hastings, 2008 From Ancient Greece to contemporary times themes of fate and destiny have served as a central worldview for many. These compelling ideas have guided those in battle and provided influence and inspirations for politicians, philosophers, and artists. Despite a pervasive concern with fate, we find that an explicit discussion of this construct is absent from psychological theory. *Twist of Fate* reconciles contemporary psychological research with the ancient and frequently held position of fatalism that was common in that era. The Greek mythological history of the Moirae, the triad of goddesses known as the Fates, offers a unique perspective on human beings by illustrating how fate and destiny influence a variety of behaviors such as drug addiction, spirituality, sexual activity, aggression, and other applied psychological topics. An analysis of the Moirae integrates diverse ideas from evolutionary psychology, neuroscience, psychoanalysis, and Nietzsche's philosophy into a fatalistic view of the human personality. The analysis raises the issues of possibilities for personal change, the role of clinical interventions, and what role freedom actually plays in the human experience. *Twist of Fate* also accounts for recent developments in personality theory and research by shedding new light on findings from evolutionary psychology, narrative theory, and trait psychology. The result is an integrative personality theory that takes the reader from Nietzsche to neuroscience.

Artist and Murderer Richard Conant Dennis, 1966 **Trauma and the Destructive-Transformative Struggle** Terrence McBride, Maureen Murphy, 2019-08-12 The impact of trauma can be both destructive and transformative. This important new book presents not only a range of theoretical frameworks through which different trauma can be understood, from the effects of childhood abuse to those of war and catastrophes, but also gives readers insights into how trauma presents itself in the consulting room. In each chapter, the author uses clinical vignettes and detailed case histories to discuss the multiplicity and complexity of the trauma involved, eschewing a simple binary conception of internal vs. external forces. A wide range of topics are covered, including the lasting imprint of early trauma such as neglect or abuse on subsequent development, the somatic solution involved in life-threatening illness, unmetabolized mourning, and embodied memory, the vibrating relationship between catastrophic external forces such as intergenerational effects and the 9/11 terrorist attacks, and the lasting effect of war on combatants and their families. Each chapter is screened through a different theoretical viewpoint, from Freud and Fairbairn to Winnicott, Bion, and Ogden, while the work of several contemporary theorists is also discussed. Crucially, the final section of the book looks at those issues faced by analysts when working with traumatized patients, highlighting the key idea of dissociation, the dilemma around empathy, and the factors that affect the patient's unconscious meaning. *Trauma and the Destructive-Transformative Struggle: Clinical Perspectives* illuminates the resilience needed by both patient and analyst. It will be a vital resource for both clinical practitioners specializing in trauma.

McAdams,2008-12-22 Drawing on cutting edge scientific research classic personality theories and stirring examples from biography and literature The Person presents a lively and integrative introduction to the science of personality psychology Author Dan McAdams organizes the field according to a broad conceptual perspective that has emerged in personality psychology over the past 10 years According to this perspective personality is made up of three levels of psychological individuality dispositional traits characteristic adaptations such as motives and goals and integrative life stories Traits adaptations and stories comprise the three most recognizable variations on psychological human nature grounded in the human evolutionary heritage and situated in cultural and historical context The fifth edition of this beautifully written text expands and updates research on the neuroscience of personality traits and introduces new material on personality disorders evolution and religion attachment in adulthood continuity and change in personality over the life course and the development of narrative identity *The Mindscapes of Art* Roy Huss,1986 In this original study Roy Huss utilizes less orthodox theories and recent advances in developmental psychology to illustrate the wealth of possibilities available to the critic who understands the artist as striving toward the integration of form and feeling It advances in depth analysis of a variety of literary dramatic and cinematic works including Sophocles Oedipus plays John Osborne s Look Back in Anger John Knowles s A Separate Peace and Rilke s The Notebooks of Malte Laurids Brigge
