6th International Conference on Ignition Systems for SI Engines - 7th International Conference on Knocking in SI Engines Marc Sens, IAV GmbH IAV GmbH, 2024-10-28 In addition to the indisputably necessary electrification of the transport sector which is currently being ramped up internal combustion engines will still be urgently needed in the future Otherwise the demand for mobility in the on road off road and non road sectors cannot be met There is no doubt that these internal combustion engines will have to be improved regarding efficiency plus lower emissions and nowadays more and more important upgraded for zero and low carbon fuels Even though Spark Ignition SI engines have been around for more than a century there is still a lot of room for improvement particularly in terms of power density ignition combustion control and preventing uncontrolled combustion To offer all interested developers an inspiring exchange platform for the latest developments IAV established two exciting conferences more than two decades ago which are now held under the heading Two Conferences One Goal This volume brings together the contributions to this conference *Influence of Noise Control Components and Structures on Turbojet Engine Testing and Aircraft Ground Operation* Bonard E. Morse, 1962 A *Quasi-Dimensional SI Burn Rate Model for Carbon-Neutral Fuels* Sebastian Hann, 2021-02-09 Sebastian Hann describes the development of a quasi dimensional burn rate model that enables the prediction of a fuel variation without the need for a recalibration of the model The model is valid for spark ignition combustion engines powered by conventional and carbon neutral fuels Its high predictive ability was achieved by modeling the fuel dependent laminar flame speed based on reaction kinetics calculations In addition the author discards a fuel influence on flame wrinkling by performing an engine measurement data analysis He investigates the fuel influence on engine knock and models it via ignition delay times obtained from reaction kinetics calculations Story Sorcery Belinda Nell, 2025-08-22 Ever wondered why your brilliant marketing campaigns land with all the grace of a giraffe on roller skates Welcome to the delightfully twisted world where neuroscience meets marketing and your customer s brain becomes your secret weapon ethically of course Story Sorcery reveals the shocking truth whilst you ve been crafting logical arguments about features and benefits your customers brains have already decided whether they fancy you or not In roughly 13 milliseconds That s faster than it takes you to realise you ve put odd socks on Drawing from cutting edge research at Harvard MIT and Stanford this book exposes the beautiful chaos happening inside every customer s head You ll discover why 95% of purchasing decisions happen unconsciously how stories literally rewire listener s brains and why Pepsi s Kendall Jenner advert became a 6 billion lesson in what not to do Inside this brain bending journey you ll learn Why your reptilian brain acts like the world s most paranoid bouncer How to speak to all three brains in your customer s head yes they have three The neuroscience behind why people queue for hours to buy things they could order online Ethical influence techniques that make customers thank you instead of tolerate you Why that visual information is processed 60 000 times faster than text statistic is complete bollocks Perfect for Marketers tired of shouting

into the digital void Business owners who want customers to actually listen Anyone curious about why humans make beautifully irrational decisions People who enjoy science served with a generous helping of wit This isn't about manipulation it's about communication that works with human nature instead of wrestling against it Because understanding minds isn't just good business it's good karma Warning May cause sudden clarity about why your previous marketing felt like performing Shakespeare to a room full of goldfish
