The Information Explosion:

Information Overload Judith B. Strother, Jan M. Ulijn, Zohra Fazal, 2012-10-02 This book covers the ever increasing problem of information overload from both the professional and academic perspectives Focusing on the needs of practicing engineers and professional communicators it addresses the causes and costs of information overload along with strategies and techniques for reducing and minimizing its negative effects The theoretical framework of information overload and ideas for future research are also presented The book brings together an international group of authors providing a truly global point of view on this important rarely covered topic The Information Analysis Center Federal Council for Science and Technology (U.S.). Committee on Scientific and Technical Information, 1969 Three-Dimensional Model Analysis and Processing Faxin Yu, Zheming Lu, Hao Luo, Pinghui Wang, 2011-02-03 With the increasing popularization of the Internet together with the rapid development of 3D scanning technologies and modeling tools 3D model databases have become more and more common in fields such as biology chemistry archaeology and geography People can distribute their own 3D works over the Internet search and download 3D model data and also carry out electronic trade over the Internet However some serious issues are related to this as follows 1 How to efficiently transmit and store huge 3D model data with limited bandwidth and storage capacity 2 How to prevent 3D works from being pirated and tampered with 3 How to search for the desired 3D models in huge multimedia databases This book is devoted to partially solving the above issues Compression is useful because it helps reduce the consumption of expensive resources such as hard disk space and transmission bandwidth On the downside compressed data must be decompressed to be used and this extra processing may be detrimental to some applications 3D polygonal mesh with geometry color normal vector and texture coordinate information as a common surface representation is now heavily used in various multimedia applications such as computer games animations and simulation applications To maintain a convincing level of realism many applications require highly detailed mesh models However such complex models demand broad network bandwidth and much storage capacity to transmit and store To address these problems 3D mesh compression is essential for reducing the size of 3D model representation **Learning Values Lifelong** Michael M.
