World Debra Grodin, Thomas R. Lindlof, 1996-01-18 In today's media saturated world identities are no longer built solely within the close knit communities of family neighborhood school and work Today media are part of our world and therefore play an important role in the formulations of our identities or constructions of self In a truly postmodern mode Constructing the Self in a Mediated World not only brings together the usually segregated areas of interpersonal and mass communication but also incorporates works from scholars in sociology psychology and women's studies as well Each essay examines our understanding of self in a different context of mediated culture within a specific framework of interpretive theories such as critical theory social constructionist theory and feminism This volume provides insights into issues of self and identity in contemporary mediated culture Designed for advanced students and experienced researchers in communication both media and interpersonal sociology psychology and women's studies Constructing the Self in a Mediated World raises important questions and contributes greatly to its field John Dewey and the Habits of Ethical Life Jason Kosnoski, 2010-09-23 This book uses John Dewey to articulate discursive practices that would help citizens form better intellectual and moral relationships with their fragmented shifting political environment These practices do not impart more or better information to citizens but instead consist in dialog exhibiting rhythms and patterns that increase their interest in inquiring how distant events and communities affect their individual lives The basis for these practices can be found in Dewey's claim that teachers can lead class discussions with particular aesthetic qualities that encourage students to expand the scale of the realm of events that they deem important to their lives The ability to forge moral and intellectual links with distant political events becomes all the more necessary in our current environment not only are individuals' lives increasingly affected by global

events but also such events constantly shift across an increasingly liquid social landscape comprised of decentralized institutions instantaneous communication and easy transportation Dewey saw early on how such aesthetics of society or its spatial and temporal qualities might undermine citizens understanding and concern for the larger public This concern for how the movement and location of elements of the social environment might affect citizen perception ties Dewey to many contemporary geographers economists and social theorists normally not associated with his work If Dewey s classrooms were to be reinterpreted as political associations and his teachers as organizers individuals discussing the origins of their seemingly local issues in such associations could forge passionate moral connections with the contemporary liquid public Subsequently they might begin to increasingly care for participate in global politics and seek solidarity with seemingly distant communities

Mapping the Edges and the In-between Nancy Nyquist Potter, 2009-06-25 Borderline Personality Disorder BPD is a diagnosis given to a significant number of people in the Western world Yet many of the core concepts symptoms that go with this diagnosis are questionable This book presents a compelling analysis of BPD arguing that it needs to be approached in a new light one that will benefit patients

Diagnosis as Cultural Practice Judith Felson Duchan, Dana Kovarsky, 2009-02-26 This book is about the doing and experiencing of diagnosis in everyday life Diagnoses are revealed as interactive negotiations rather than as the assigning of diagnostic labels The authors demonstrate through detailed discourse analyses how the diagnostic process depends on power and accountability as expressed through the talk of those engaged in the diagnostic process The authors also show that diagnostic decisions are not only made by professional experts trained in the art and science of diagnosis but they can also be made by anyone trying to figure out the nature of everyday problems Finally diagnostic reasoning is found to extend beyond typical diagnostic situations occurring in unexpected places such as written letters of recommendation and talk about the nature of communication Together the chapters in this book demonstrate how diagnosis is a communication practice deeply rooted in our culture The book is interdisciplinary and unusually broad in its focus The authors come from different experiential scholarly backgrounds Each of them takes a different look at the impact and nature of the diagnostic process The diagnoses discussed include autism Alzheimer s disease speech and language disorders and menopause The focus is not only on the here and now of the diagnostic interaction but also on how diagnoses and diagnostic processes change over time The book can serve as an undergraduate or graduate text for courses offered in various disciplines including communication sociology anthropology communication disorders audiology linguistics medicine and disability studies

Self-Deception's Puzzles and Processes Jason Kido Lopez, 2016-08-16 The contemporary literature on self deception was born out of Jean Paul Sartre s work on bad faith lying to oneself As time has progressed the conception of self deception has moved further and further away from Sartre s conception of bad faith In *Self Deception s Puzzles and Processes A Return to a Sartrean View* Jason Kido Lopez argues that this departure is a mistake and that we should return to thinking about self deception in a Sartrean fashion in which we are self deceived when we intentionally use the strategies and methods of interpersonal deception on ourselves Since literally tricking ourselves cannot work we will always see through our own self deception after all self deception merely consists of the attempt to trick ourselves in this way Other scholars have rejected this notion of self deception historically dismissing it as paradoxical Lopez argues first that it isn t paradoxical and he further suggests that moving away from this notion of self deception has caused the contemporary literature on the topic to be littered with disparate and conflicting theories Indeed there are a great many ways to avoid the allegedly paradoxical Sartrean notion of self deception and the resulting plethora of accounts lead to a fragmented picture of self deception If however the Sartrean view isn t paradoxical then there was no need for the host of contradictory theories and most researchers on self deception have missed what was originally so intriguing about self deception that it like bad faith is the process of literally trying to trick oneself into believing what is false or unwarranted *Self Deception s Puzzles and Processes* will be of great interest to students and scholars of epistemology philosophy of mind psychology and continental philosophy and to anyone else interested in the problems of self deception **Self-Concept Clarity** Jennifer Lodi-Smith, Kenneth G. Routledge International Handbook of Self-Control in Health and Well-Being

Denise de Ridder, Marieke Adriaanse, Kentaro Fujita, 2017-10-30 The ability to prioritise long term goals above short term gratifications is crucial to living a healthy and happy life We are bombarded with temptations whether from fast food or faster technologies but the psychological capacity to manage our lives within such a challenging environment has far reaching implications for the well being not only of the individual but also society as a whole The Routledge International Handbook of Self Control in Health and Wellbeing is the first comprehensive handbook to map this burgeoning area of research by applying it to health outcomes and personal well being Including contributions from leading scholars worldwide the book incorporates new research findings that suggest that simply inhibiting our immediate impulses isn't the whole story there may be more options to improve self control than simply by suppressing the ego Divided into six coherent sections the book provides an overview of the research base before discussing a range of interventions to help improve self control in different contexts from smoking or drinking too much to developing self control over aggression or spending money The only definitive handbook on this far reaching topic this essential work will appeal to researchers and students across health and social psychology as well as related health sciences

Theology, Psychology and the Plural Self Léon Turner, 2016-02-17

Is the human self singular and unified or essentially plural This book explores the seemingly disparate ways that Christian theology and the secular human sciences have approached this complex question The latter have largely embraced the idea of the plural self as an inescapable even adaptive feature of psychological life Contemporary Christian theology by contrast has largely neglected recent psychological accounts of the naturalness of self plurality and has sought to reaffirm the self's unity in opposition to those postmodern theorists who would dismantle it Through an original analysis of recent theological and secular accounts of self and personhood this book examines the extent of the intertheoretical disparity and its broader implications for theology's dialogue with the human sciences in general and psychology in particular It explains why theologians ought to take questions about the plurality of self very seriously and how they overlap with many of the central concerns of contemporary theological anthropology including the notions of relationality particularity and human sinfulness Introducing a novel psychological framework to distinguish various understandings of self disunity the author argues that contemporary theology's blanket condemnation of self multiplicity is misconceived and identifies a possible means of reconciling theological and human scientific accounts

Self Definition Teodros Kiros, 2019-10-10

Self Definition argues that sex gender and race are constructions by the ineffable self as it seeks to define its possibilities free of domination The self's embodiments are themselves performances of self definition Teodros Kiros supports his argument by a careful reading of the literature from both the Global South and Global North that spans figures works and eras from antiquity to our late modern present These readings demonstrate that race gender and sex are performed in the Global South radically differently

from in the Global North These three notions as markers of identity are fluid open and expansive and Kiros brilliantly shows this through inquiry into thought rooted in Egypt Ethiopia India and China By the time that the Global North forges possibilities of the self in the modern period race gender and sex become fixed Biology and anatomy become understood as destinies and the possibilities of the self are deeply constrained This book approaches case studies of key figures and movements chronologically and thematically and in doing so Kiros highlights the tensions between the openness of the Global South and the rigidity of the Global North through which human possibilities as exercises of self definition become clear under conditions of freedom Our views of self definition will forever be transformed after reading this important text
