Descartes Locke and Hume and explores related topics such as intentionality necessity and relations *Locke's Metaphysics*
Matthew Stuart, 2013-07-18 Though John Locke set out to write a book that would resolve questions about the origin and scope of human knowledge his *Essay Concerning Human Understanding* is also a profound contribution to metaphysics full of arguments about the fundamental features of bodies the notions of essence and kind the individuation of material objects personal identity the nature and scope of volition freedom of action freedom of will and the relationship between matter and mind Matthew Stuart examines a broad range of these arguments and explores the relationships between them He offers fresh interpretations of such familiar material as the distinction between primary and secondary qualities and Locke's account of personal identity and he also takes us deeper into less familiar territory including Locke's case against materialism and his philosophy of action Locke's *Metaphysics* shows Locke to be a more consistent systematic and interesting metaphysician than is generally appreciated It defends him against charges of muddling the definition of quality of waffling between two conceptions of secondary qualities and of vacillating in his commitment to mechanism It shows how his rejection of essentialism leads him to embrace relativism about identity and that his relativism about identity is the key to defending his account of personal identity against several objections Yet the picture of Locke that emerges is not always a familiar one Stuart's account reveals that he is a philosopher who denies the existence of relations who takes bodies to be colored only so long as we are looking at them and who is not committed to mechanism He shows that Locke takes persons to be three dimensional beings whose pasts are gappy rather than continuous Finally he shows that Locke is a volitionist who holds that we can will only our own thoughts and bodily motions and not such episodes as lighting a candle or turning the pages of a book
