Feachem, 1992 Sick adults consume often more than half of all resources allocated to the health sector This volume draws attention to the causes and results of disease and ill health in adults in developing countries and to the burden they impose not only on individuals but on their families and society as well Researchers and policymakers will find this work essential because of its useful data on adult morbidity and mortality as well as its call for more information on problems and risk factors Smoking and Health Bulletin, 1986 *Smoking and World Health* United States. Murti, 1992 Tobacco use is widely recognized as the most important preventable cause of death and disease in the world today In most countries its use is synonymous with cigarette smoking but in some tobacco is more frequently used in other forms The health consequences of cigarette smoking and other forms of tobacco use encompass a wide spectrum of diseases including cancers of the mouth larynx lung pharynx and oesophagus diseases of the heart circulatory system and lungs and if used during pregnancy adverse effects on the foetus Even second hand passive smoking is shown to cause and influence the risks of diseases Tobacco control in any country however is not simply a health problem It has major implications for economics agriculture law and individual and social behaviour Therefore tobacco control must involve a multidimensional multidisciplinary approach In this volume the issue of tobacco control is addressed from many points of view by leading international experts in clinical medicine public health biostatistics and behavioural sciences agriculture law and policy analysis The articles provide an in depth overview of the various topics central to the theme of tobacco control This constitutes a valuable resource work on a subject of increasing concern containing state of the art reviews original research papers and thought provoking articles **Second Thoughts on Capitalism and the State** Leslie Sklair, 2022-05-02 This collection of essays highlights the need for sociological and political analysis of actual alternatives to capitalism and the existing system of so called nation states It challenges the conventional idea that capitalism can be successfully reformed to meet the needs of most people in the world confronting it with the existential threats posed by the perfect storm of climate change and the Anthropocene hyper urbanization and the Coronavirus pandemic Written over a period of 50 years it charts the ways in which capitalism and socialism have evolved as global systems their successes and failures to the point that it is

easier to imagine the end of the world than the end of capitalism It offers ways forward community by community

Against Criminology Stanley Cohen, 2017-07-05 During the 1960s traditional thinking about crime and its punishment deviance and its control came under radical attack The discipline of criminology split into feuding factions and various schools of thought emerged each with quite different ideas about the nature of the crime problem and its solutions These differences often took political form with conservative liberal and radical supporters and the resulting controversies continue to reverberate throughout the fields of criminology and sociology as well as related areas such as social work social policy psychiatry and law Stanley Cohen has been at the center of these debates in Britain and the United States This volume is a selection of his essays written over the past fifteen years which contribute to and comment upon the major theoretical conflicts in criminology during this period Though associated with the new or radical criminology Cohen has always been the first to point out its limitations particularly in translating its theoretical claims into real world applications His essays cover a wide range of topics political crime the nature of individual responsibility the implications of new theories for social work practice models of crime used in the Third World banditry and rebellion and the decentralization of social control Also included is a previously unpublished paper on how radical social movements such as feminism deal with criminal law Many criminology textbooks present particular theories or research findings This book uniquely reviews the main debates of the last two decades about just what the role and scope of the subject should be
