Energy Citizenship Trish Kahle, 2024-10-29 The history of the modern United States is the history of coal and of coal miners Trish Kahle reveals miners as forgers of a coal fired social contract that was contested throughout the twentieth century as Americans sought to define the meaning of citizenship in an energy intensive democracy Energy Citizenship traces the uncertain relationship between coal and democracy from the Progressive Era to the election of Ronald Reagan examining how miners' democratic aspirations confronted the deadly record of the country's coal mines Miners and their communities bore the burdens of energy production while reaping far fewer of the benefits of energy consumption But they insisted that death in the mines far from being inevitable was a political choice Kahle demonstrates that coal miners struggled to democratize the workplace secure civil and social rights and obtain restitution for the human toll of progress reshaped U S laws regulatory administrations and political imaginaries Energy policy in the twentieth century was about not only managing fuels but also negotiating the relationship between coal miners and the rest of the country which depended on the electric power and steel produced with the coal they mined Placing coal miners at the center of a sweeping new history of the United States this book unmaskes the violence of energy systems and shows how energy governance cuts to the heart of persistent questions about democracy justice and equality

Congressional Record United States. Congress, 1998 **Who Owns Appalachia?** Appalachian Land Ownership Task Force, 2021-10-21 Long viewed as a problem in other countries the ownership of land and resources is becoming an issue of mounting concern in the United States Nowhere has it surfaced more dramatically than in the southern Appalachians where the exploitation of timber and mineral resources has been recently aggravated by the ravages of strip mining and flash floods This landmark study of the mountain region documents for the first time the full scale and extent of the ownership and control of the region's land and resources and shows in a compelling yet non polemical fashion the relationship between this control and conditions affecting the lives of the region's people Begun in 1978 and extending through 1980 this survey of land ownership is notable for the magnitude of its coverage It embraces six states of the southern Appalachian region

Virginia West Virginia Kentucky Tennessee North Carolina and Alabama From these states the research team selected 80 counties and within those counties field workers documented the ownership of over 55 000 parcels of property totaling over 20 million acres of land and mineral rights The survey is equally significant for its systematic investigation of the relations between ownership and conditions within Appalachian communities Researchers compiled data on 100 socioeconomic indicators and correlated these with the ownership of land and mineral rights The findings of the survey form a generally dark picture of the region local governments struggling to provide needed services on tax revenues that are at once inadequate and inequitable economic development and diversification stifled increasing loss of farmland a traditional source of subsistence in the region Most evident perhaps is the adverse effect upon housing resulting from corporate ownership and land speculation Nor is the trend toward greater conglomerate ownership of energy resources the expansion of absentee ownership into new areas and the search for new mineral and energy sources encouraging Who Owns Appalachia will be an enduring resource for all those interested in this region and its problems It is moreover both a model and a document for social and economic concerns likely to be of critical importance for the entire nation

A Darkness at Dawn Harry M. Caudill, 2021-11-21 Outspoken Appalachian writer Harry M Caudill analyzes the exploitation and decline of the eastern Kentucky mountain lands which have rendered no people in the nation more forlorn than the Appalachian highlanders in our time Frontier attitudes a strong attachment to the land and isolation have produced in Appalachia a backwoods culture which made its people susceptible to an outside exploitation of their resources that has perpetrated on them a passive society largely dependant on relief But the times says Mr Caudill are changing A growing world population and global industrialization have created a drastically altered situation in eastern Kentucky The area s resources of energy are essential to the progress and well being not only of the nation but also of the world and the world is prepared to court the favor of the people who control these resources and is prepared to pay the price demanded by those owners Mr Caudill makes an eloquent plea for Kentuckians to reclaim the resources that lie in their mountains and to demand their fair share of the wealth generated by those resources If they are willing to do this the state and especially the people in eastern Kentucky can have a bright and prosperous future But they can delay no longer They must break the mold of passivity and take destiny into their own hands An attorney in Whitesburg Kentucky Harry M Caudill is the author of such well known books as Night Comes to the Cumberlands Dark Hills to Westward and My Land is Dying The Kentucky Bicentennial Bookshelf is a celebration of two centuries of the history and culture of the Commonwealth

Land Ownership Patterns and Their Impacts on Appalachian Communities, 1981
