The Impossible Dream Ronald L. Sobel, Robert E. Dallos, 1975 , *The Investigation of White-collar Crime* , 1977

Financial Crimes: Psychological, Technological, and Ethical Issues Michel Dion, David Weisstub, Jean-Loup

Richet, 2016-06-08 This book on the psychology of white collar criminals discusses various cases of financial crime while also attempting to delve into the minds of the criminals in question The literature on this topic is growing as it gains momentum in the scientific field as a result of the extremely negative impact white collar crime has on its victims Because there is considerable damage and vulnerability from these crimes it is important to begin to classify them and to understand the minds of those that commit these offenses While the current literature is not extensive this work provides a closer look into the various ethical and legal facets of financial crime and helps to uncover the social psychological and neurobiological factors that intersect in the minds of those criminals *Other People's Money* John Kay, 2015-09-22 The finance sector of Western economies is too large and attracts too many of the smartest college graduates Financialization over the past three decades has created a structure that lacks resilience and supports absurd volumes of trading The finance sector devotes too little attention to the search for new investment opportunities and the stewardship of existing ones and far too much to secondary market dealing in existing assets Regulation has contributed more to the problems than the solutions Why What is finance for John Kay with wide practical and academic experience in the world of finance understands the operation of the financial sector better than most He believes in good banks and effective asset managers but good banks and effective asset managers are not what he sees In a dazzling and revelatory tour of the financial world as it has emerged from the wreckage of the 2008 crisis Kay does not flinch in his criticism we do need some of the things that Citigroup and Goldman Sachs do but we do not need Citigroup and Goldman to do them And many of the things done by Citigroup and Goldman do not need to be done at all The finance sector needs to be reminded of its primary purpose to manage other people's money for the benefit of businesses and households It is an aberration when some of the finest mathematical and scientific minds are tasked with devising algorithms for the sole purpose of exploiting the weakness of other algorithms for computerized trading in securities To travel further down that road leads to ruin A Financial Times Book of the Year 2015 An Economist Best Book of the Year 2015 A Bloomberg Best Book of the Year 2015 **Wayward Capitalists** Susan P. Shapiro, 1987-03-01 Recounts actual cases of security frauds explains how the SEC investigates the securities market and suggests new policies to strengthen the SEC's role as government watchdog RICO Reform United States.
