The Indus South Asia Highway Of History:

The Indus Jane Werner Watson, 1970 A profile of one of the twelve longest rivers in the world emphasizing its influence on the lives of the people who live near it South Asia in the World: An Introduction Susan S Wadley, 2014-12-18 This first book in the new Foundations in Global Studies series offers a fresh comprehensive multidisciplinary introduction to South Asia The variations in social cultural economic and political life in this diverse and complex region are explored within the context of the globalising forces affecting all regions of the world In a simple strategy that all books in the series employ the volume begins with foundational material including chapters on history language and in the case of South Asia religion moves to a discussion of globalisation and then focuses the investigation more specifically through the use of case studies The cases expose the student to various disciplinary lenses that are important in understanding the region and are meant to bring the region to life through subjects of high interest and significance to today's readers Resource boxes an important feature of the book are included to maintain currency and add utility They offer links that point readers to a rich archive of additional material connections to timely data reports on recent events official sites local and country based media visual material and so forth A website developed by Syracuse University's South Asia Center will feature additional graphic narrative and case study material to complement the book The Indus River Shane Mountjoy, 2004 Discusses the Indus River which is the chief river of Pakistan *An Agrarian History of South Asia* David Ludden, 2011-02-17 Originally published in 1999 David Ludden's book offers a comprehensive historical framework for understanding the regional diversity of agrarian South Asia Adopting a long term view of history it treats South Asia not as a single civilization territory but rather as a patchwork of agrarian regions each with their own social cultural and political histories The discussion begins during the first millennium when farming communities displaced pastoral and tribal groups and goes on to consider the development of territoriality from the sixteenth to the nineteenth centuries Subsequent chapters consider the emergence of agrarian capitalism in village societies under the British and demonstrate how economic development in contemporary South Asia continues to reflect the influence of agrarian localism As a comparative synthesis of the literature on agrarian regimes in South Asia the book promises to be a valuable resource for students of agrarian and regional history as well as of comparative world history Routledge Handbook of the History of Colonialism in South Asia Harald Fischer-Tiné, Maria Framke, 2021-09-01 The Routledge Handbook of the History of Colonialism in South Asia provides a comprehensive overview of the historiographical specialisation and sophistication of the history of colonialism in South Asia It explores the classic works of earlier generations of historians and offers an introduction to the rapid and multifaceted development of historical research on colonial South Asia since the 1990s Covering economic history political history and social history and offering insights from other disciplines and turns within the mainstream of history the handbook is structured in six parts Overarching Themes and Debates The World of Economy and Labour Creating and Keeping Order Science Race Religion Law

and Education Environment and Space Culture Media and the Everyday Colonial South Asia in the World The editors have assembled a group of leading international scholars of South Asian history and related disciplines to introduce a broad readership into the respective subfields and research topics Designed to serve as a comprehensive and nuanced yet readable introduction to the vast field of the history of colonialism in the Indian subcontinent the handbook will be of interest to researchers and students in the fields of South Asian history imperial and colonial history and global and world history

The Archaeology of Seafaring in Ancient South Asia Himanshu Prabha Ray,2003-08-14 Prior to European expansion communities of the Indian subcontinent had a strong maritime orientation In this new archaeological study Himanshu Prabha Ray explores seafaring activity religious travel and political economy in this ancient period By using archaeological data from the Red Sea to the Indonesian archipelago she reveals how the early history of peninsular South Asia is interconnected with that of its Asian and Mediterranean partners in the Indian Ocean Region The book departs from traditional studies focusing on the communities maritime history rather than agrarian expansion and the emergence of the state Rather than being a prime mover in social economic and religious change the state is viewed as just one participant in a complex interplay of social actors including merchants guilds boat builders sailors pilgrims religious clergy and craft producers A study that will be welcomed by students of Archaeology and Ancient History particularly those interested in South Asian Studies
