that psychological trauma can occur. Often however the athlete's psychological response is not appropriately addressed. The goal of the Injured Recovering Athlete Group (IRAG) is to acknowledge and honor the whole athlete's injury experience including the cognitive, behavioral, psychological and emotional outcomes that ensue and to provide an integrated approach that leads to increased well-being. The proposed Injured Recovery Athlete Group (IRAG) is comprised of an integrated theoretical framework that includes the Integrated Model of Response to Sport Injury (IRSI), mindfulness and person-centered therapy. The strengths and limitations of the project are discussed along with implications and suggestions for individuals interested in working with injured athletes.

Rebound Cindy Kuzma, Carrie Jackson Cheadle, 2019-08-22. The evidence-backed guidance in this long overdue resource is as crucial to managing the mental side of injury as good healthcare providers are to managing the physical side. Matt Fitzgerald, author of *80/20 Running*. Written by a leading mental skills coach and contributing editor to *Runner's World US*, this is a practical guide to building the psychological resilience that athletes need to recover from injury and rebound stronger. Injuries affect every athlete from the elite Olympian to the weekend racer. In the moment, a traumatic crash, a torn muscle or a stress fracture can feel like the most devastating event possible. While some athletes are destroyed by the experience, others emerge from their recovery better, stronger and more confident than ever. The key to a swifter, stronger comeback is the use of mental skills, psychological tools that enable an athlete to take control of their recovery and ultimately use the experience to their advantage. Injury and other setbacks are inevitable, but with training, overcoming them skillfully and confidently is possible. This book will provide a clear, compelling explanation of psychological recovery from injury and a practical guide to building mental resilience. Weaving together personal narratives from star athletes, scientific research and the specialized clinical expertise of mental skills coach Carrie Jackson Cheadle, it will contain more than 45 Mental Skills and Drills that athletes can use at every phase of their recovery process. These same strategies can help athletes who aren't currently injured reduce their vulnerability to injury and enable any individual to reach new heights within their sport and beyond.
