The International Anarchy, 1904-1914 Goldsworthy Lowes Dickinson, 1926 List of authorities cited in the text pages 479-491 *The International Anarchy (RLE Anarchy)* G. Lowes Dickinson, 2013-09-13 This volume a classic of its time discusses

the tragic evolution of European politics from 1870-1914. The main part of the book describes the development of the relations between France, Germany, Russia and Britain and follows the sequence of political events: the Triple Alliance and Bismarck's secret treaties, the Triple Entente, Morocco and the Conference of Algiers, the Annexation of Bosnia, Agadir, Tripoli, the Baghdad Railway, Persia, the Far East, the Balkan Wars. Its value remains because while other books deal with the actions of individuals, this volume indicates the underlying forces of which they were the victims. **Creating International**

Studies Lucian M. Ashworth, 2017-07-05 Using the words of Norman Angell and David Mitrany, this book explores the liberal roots of international relations and argues that there was no Realist/Idealist Great Debate. *International Relations Theory*

Michael Haas, 2016-12-27 While many texts on international relations deal only with ideologies, this book goes beyond discussion of ideology to provide an understanding of how global economics, politics and society operate. The book begins with a history of the International Studies Association, which was founded to develop empirically based knowledge and was opposed to ideological isms as biased guides to policy. The book focuses on four major paradigms: Marxian, Mass Society, Community Building, and Rational Choice, with diagrams indicating their empirical predictions over time. The Marxian paradigm focuses on scientific claims of Marx and Engels. The Mass Society paradigm explains why democracies become dysfunctional. The Community Building paradigm explains how communities can be and are built at the local, national, regional and international levels. The Rational Choice paradigm assembles proposed explanations of reason-based economic, political and social life to demonstrate what they have in common. Other candidates for paradigms are reviewed with a focus on why they need further development to become major paradigms at the decision-making, dyadic, societal, national and international system levels of analysis. The "Man" Question in International Relations Marysia Zalewski, Jane Parpart, 2019-04-05

Originally published in 1998, *The Man Question in International Relations* looks at the prevalence of man in the world of international relations. The book argues that focusing on women as a way of changing the gender of international relations can position women as the problem. The authors of this book suggest that the problem is not woman but man. Rather than highlighting the absences and presence of women in the theories and practices of international relations, the authors concentrate on questioning the practices of masculinities, the hegemony of men and the subject of man. In this way, they hope to destabilize the field in ways that adding women and stirring has not. *International Organizations* Jan

Klabbers, 2017-05-15 International organizations have come to occupy a central position in international governance, exercising many public functions and facilitating political debate amongst states and other actors, though it is only recently that the focus of legal discussions has begun to shift to controlling the activities of organizations. This volume assembles

sixteen important essays addressing various issues relating to the law of international organizations highlighting theoretical issues and ongoing political debates and emphasizing issues of control The introductory essay provides an overview of the development of the politico legal debate and situates the law of international organizations historically and in its contemporary context

History and International Relations Thomas W. Smith, 2003-09-02 This book is a major contribution to the debate about philosophy and method in history and international relations The author analyses IR scholarship from classical realism to quantitative and postmodern work

Modernism and the Social Sciences Mark Bevir, 2017-09-28 This study explores the rise and nature of modernist approaches to economics sociology international relations administration language history and anthropology

The Origins of the First World War James Joll, Gordon Martel, 2013-11-05 James Joll's study is not simply another narrative retracing the powder trail that was finally ignited at Sarajevo It is an ambitious and wide ranging analysis of the historical forces at work in the Europe of 1914 and the very different ways in which historians have subsequently attempted to understand them The importance of the theme the breadth and sympathy of James Joll's scholarship and the clarity of his exposition have all contributed to the spectacular success of the book since its first appearance in 1984 Revised by Gordon Martel this new 3rd edition accommodates recent research and an expanded further reading section
