Kleespies, 2016-09-19 The Oxford Handbook of Behavioral Emergencies and Crises includes the most up to date and valuable research on the evaluation and management of the most challenging patients or clients faced by mental health providers individuals who are at high risk of suicide of other directed violence or of becoming the victims of interpersonal violence These are cases in which the outcome can be serious injury or death and

there can be negative consequences not only for the patient but also for the patient's family and friends for the assessing or treating clinician and for the patient's clinic or medical center. Virtually all mental health clinicians with an active caseload will see individuals with such issues. This Handbook is comprised of chapters by leading clinicians, researchers, and scholars in this area of practice. It presents a framework for learning the skills needed for assessing and working competently with such high-risk individuals. Chapters draw a distinction between behavioral emergencies and crises and between emergency intervention and crisis intervention. The book examines the interrelated aspects of the major behavioral emergencies that is, for example, the degree to which interpersonal victimization may lead an individual on a pathway to later suicidal or violent behavior or the degree to which suicidal individuals and violent individuals may share certain cognitive characteristics. This resource is not simply a knowledge base for behavioral emergencies; it also presents a method for reducing stress and acquiring skills in working with high-risk people.

SPEC - Handbook of Clinical Neurology, Volume 144, Huntington Disease, 12-Month Access, eBook, 2017-09-22

Huntington Disease summarizes the most recent findings related to the disease, providing both cutting-edge coverage for clinical research specialists looking to expand their knowledge base of Huntington disease information as well as solid groundwork for advanced students from various backgrounds: neurology, psychiatry, neuropsychology, genetics. The volume includes all major areas of Huntington disease: clinical care and research, whereas many other HD texts focus solely on neurological symptoms. This book also addresses behavioral and cognitive symptoms, brain imaging, and family dynamics and therapeutic alliances in working with individuals affected by HD. Clinical trials are covered extensively, including design considerations for therapeutic studies. The devastating nature of Huntington's disease is well appreciated throughout the neuroscience, neurology, and psychiatric communities, and a great amount of basic and clinical research is currently taking place. However, much of that occurs in isolated research silos, and it is critical that an interdisciplinary resource be developed to provide in-depth information to enhance communication and collaboration. This volume in the Handbook of Clinical Neurology series is that resource. Includes coverage of both basic science and clinical aspects of the disease as well as treatment, experimental therapeutics, and biomarkers. Provides an essential resource for the non-neurologist, including necessary background for understanding the disease before making a more detailed study proposal. Provides an interdisciplinary approach that can be applied in everyday clinic and research efforts. Features chapters edited by leaders in the field around the globe; the broadest expert coverage available.

Many instruments have been developed to measure a myriad of sexuality-related states, traits, behaviours, and outcomes. Few are easily accessible, and the information is often limited concerning appropriate use and psychometric properties. To counter these problems, the Handbook of Sexuality-Related

Measures reproduces more than 200 instruments accompanied by essential information for their use in research educational and clinical settings Each chapter describes the development and appropriate use of each instrument Reliability and validity data are summarized and referenced *The Writer's Market* Kathryn Struckel Brogan,2003
