Ankle bone. The big bump you feel at your ankle is really just a part of the tibia. The ankle bones are hidden away, and you can't feel them.

Foot bones. Each foot has 26 bones in it. You can feel the metatarsals on the flat top part of your foot. You have five metatarsals. There's one for each toe. In the toes, the bones are called **phalanges**. You can feel many bones in your foot because there isn't much padding there, either.

Your bones are made of living cells. Bones can grow and repair themselves. If you break a bone, your body will begin making new bone cells. The two broken pieces of bone will grow back together. You will have to wear a cast. The cast will hold the two broken pieces together in the same place so that they can mend.
