Skepticism And The Veil Of Perception:

Skepticism and the Veil of Perception Michael Huemer, 2001-07-17 Since Descartes one of the central questions of Western philosophy has been that of how we know that the objects we seem to perceive are real Philosophical skeptics claim that we know no such thing Representationalists claim that we can gain such knowledge only by inference by showing that the hypothesis of a real world is the best explanation for the kind of sensations and mental images we experience Both accept the doctrine of a veil of perception that perception can only give us direct awareness of images or representations of objects not the external objects themselves In contrast Huemer develops a theory of perceptual awareness in which perception gives us direct awareness of real objects not mental representations and we have non inferential knowledge of the properties of these objects Further Huemer confronts the four main arguments for philosophical skepticism showing that they are powerless against this kind of theory of perceptual knowledge

Skepticism and the Veil of Perception Michael Huemer, 2001 In opposition to both skeptics and representationalists Huemer philosophy U of Colorado Boulder presents a theory of perceptual awareness according to which perception gives us direct awareness of real objects and non inferential knowledge of the properties of these objects He responds to the major arguments for skepticism including the infinite regress argument the problem of the criterion the brain in the vat and the impossibility of verification c Book News Inc

Hegel and Skepticism Michael N. Forster, 1989 The rejection by Anglo Saxon philosophers of much continental philosophy from Hegel on down is largely based on the perceived failure of continental thinkers to grapple with the tough questions of epistemology in general and skepticism in particular Forster demonstrates that Hegel did not in fact ignore epistemology but on the contrary he fought a tireless and subtle campaign to defeat the threat of skepticism Forster's work should dispel once and for all the view that Hegel was naive or careless in epistemological matters Forster begins by discussing Hegel's critical interpretation of the skeptical tradition in particular his convincingly argued case for the superiority of ancient over modern skepticism He goes on to show that the difficulties characteristic of ancient skepticism play a crucial and fascinating role in Hegel's philosophy of history Hegel sees in the emergence of these difficulties an explanation of why the harmonious unified Greek culture collapsed and was replaced by the division and alienation characteristic of subsequent western culture Finally Forster examines the elaborate and ingenious system of defenses erected by Hegel to protect his philosophical thought against skeptical difficulties as the core of a somewhat broader epistemological project Along the way Forster makes much that has hitherto remained obscure in Hegel's texts intelligible for the first time This book should cause a re evaluation of Hegel and German Idealism generally and contribute to a re evaluation of the skeptical tradition in philosophy

Kant and Skepticism Michael N. Forster, 2010-05-17 This book puts forward a much needed reappraisal of Immanuel Kant's conception of and response to skepticism as set forth principally in the Critique of Pure Reason It is widely recognized that Kant's theoretical philosophy aims to answer skepticism and reform

metaphysics Michael Forster makes the controversial argument that those aims are closely linked He distinguishes among three types of skepticism veil of perception skepticism which concerns the external world Humean skepticism which concerns the existence of a priori concepts and synthetic a priori knowledge and Pyrrhonian skepticism which concerns the equal balance of opposing arguments Forster overturns conventional views by showing how the first of these types was of little importance for Kant but how the second and third held very special importance for him namely because of their bearing on the fate of metaphysics He argues that Kant undertook his reform of metaphysics primarily in order to render it defensible against these types of skepticism Finally in a critical appraisal of Kant's project Forster argues that despite its strengths it ultimately fails for reasons that carry interesting broader philosophical lessons These reasons include inadequate self reflection and an underestimation of the resources of Pyrrhonian skepticism

Hegel's Idea of a Phenomenology of Spirit Michael N.

VanArragon,2011-07-28 A fundamental question in philosophy of religion is whether religious belief must be based on evidence in order to be properly held In recent years two prominent positions on this issue have been staked out evidentialism which claims that proper religious belief requires evidence and Reformed epistemology which claims that it does not Evidence and Religious Belief contains eleven chapters by prominent philosophers which push the discussion in new directions The volume has three parts The first part explores the demand for evidence some chapters object to it while others seek to restate it or find space for compromise between Reformed epistemology and evidentialism The second part explores ways in which beliefs are related to evidence that is ways in which the evidence for or against religious belief that is available to a person can depend on that person's background beliefs and other circumstances The third part contains chapters that discuss actual evidence for and against religious belief Evidence for belief in God includes the so called common consent of the human race and the way that such belief makes sense of the moral life evidence against it includes profound puzzles about divine freedom which suggest that it is impossible for a being to be morally perfect Self-Knowledge Brie
