Small Nuclear Forces The Washington Papers 103:

Small Nuclear Forces Rodney W. Jones, 1984 *Strategic Consequences of Nuclear Proliferation in South Asia* Neil Joeck, 2025-04-01 *Strategic Consequences of Nuclear Proliferation in South Asia* 1986 examines the consequences for particular states should India and Pakistan decide to deploy nuclear weapons It looks in detail at the positions of both India and Pakistan and the responses of the United States the Soviet Union and China and their respective strategic positions This book includes contributions on the larger question of how nuclear pariah states pose a separate problem of nuclear proliferation as well as on the broader challenges to the nuclear non proliferation regime Strategic Calling James Allen Smith, 1993 **Military Industry and Regional Defense Policy** Timothy D. Hoyt, 2017-07-05 *Military Industry and Regional Defense Policy* re examines military industrialization in the developing world focusing on policy making in producer states and the impact of security perceptions on such policy making Timothy D Hoyt reassesses the role of regional state sub systems in international relations and recent historical studies of international technology and arms transfers Looking at Israel Iraq and India the three most powerful regional powers in the Cold War era he presents an expert analysis of the three sided phenomena of the regional hegemony the regional competitor and the small over achiever This new book breaks away from existing literature on military industries in the developing world which has focused on their economic and development costs and benefits These past studies have used primitive methodologies that focus on the production of complete weapons systems a misleading gauge in a world of growing international defense cooperation They have also ignored empirical evidence of the impact of local military industrial production on Cold War regional conflict and of the defence planning and concerns that drove development of indigenous military industries in key regional powers This new text delivers an incisive new perspective Data Manipulation in Sci-tech Libraries Ellis Mount, 1985 **Military Technology, Armaments Dynamics and Disarmament** Hans Gunter Brauch, 1989-01-13 *Inadvertent Nuclear War* Hå. Wiberg, I.D. Petersen, P. Smoker, 2013-10-22 Since the dramatic end of the Pacific War in 1945 the threat of nuclear war has exercised the minds of many Initial fears concerned the risk that a political crisis between the Superpowers would escalate through military confrontation into a calculated nuclear war Another scenario pictured a new Hitler commanding a nuclear capable state prepared to use such weapons irrationally possibly sparking a catalytic nuclear war between the major Powers More recently attention has shifted towards the risk of the accidental release of nuclear weapons While the risk of intentional conflict between the major Powers has lessened the arsenals have only been marginally reduced leaving the possibility of accidental release as perhaps the most threatening case Inadvertent Nuclear War presents the risk in terms of the reliability and instability of the human and technical systems governing release with contributions ranging from the engineering of computer software to the psychology of the chain of command As Dr Wiberg states in his introduction No known technical construction human being or social organization is absolutely failsafe *Soviet-American Relations with Pakistan, Iran and*

Afghanistan Hafeez Malik, 1987-03-02 This is a collective volume on Soviet American relations with the three rimland states of Iran Afghanistan and Pakistan The contributors argue that what happens in these three states would ultimately affect the states in the Gulf and the Middle East The USA maintains friendly relations only with Pakistan while her relations with Iran and Afghanistan are antagonistic The future penetration of the Soviet influence in Iran and Afghanistan is assessed and probable scenarios are discussed by the seventeen contributors who represent the military diplomacy and academia The concluding chapter synthesizes the discussions and the criticism of various papers The book is the most up to date thorough analysis of superpower relations with the three neighbouring states of the Soviet Union currently available Nuclear India in the Twenty-First Century D. SarDesai, R. Thomas, 2002-05-02 This collection of essays unlike other books on this subject emphasizes strategic technological and economic factors It includes contributions from a combination of academics and governmental experts from both the United States and India Nuclear India in the Twenty First Century provides an important picture of India s nuclear intentions and capabilities and should facilitate policies that the US may consider in response to regional and global proliferation **Sea-Launched Cruise Missiles and U.S. Security** Eric H. Arnett, 1991-07-19 This is the most up to the minute survey of the vital subject of sea launched cruise missiles SLCMs to appear in ten years It systematically analyzes the technological promises and weaknesses of SLCMs especially conventionally armed land attack versions explaining sophisticated technologies in language accessible to the general reader Eric H Arnett presents a cogent assessment of the crux of the SLCM issue for U S security examining the coastal nation concept of the U S defensive position and investigating whether technology can adequately compensate for geography as Tomahawks and their Soviet counterparts give way to more advanced progeny Arnett weighs the trade offs in a frank discussion of the technologies and missions envisioned for current and future SLCMs This well researched authoritative study evaluates both U S and Soviet SLCM arsenals examines the role of arms control and unilateral initiatives in managing the dangers of SLCMs and critically assesses the claims made for the Tomahawk conventionally armed cruise missile The relevance of a changing international scene and domestic fiscal chaos to SLCM issues is fully appraised The book s eight chapters lead the reader through all aspects of this complex field with admirable lucidity Early chapters describe missions envisioned for U S conventionally armed SLCMs and assess actual SLCM technology Chapter 4 addresses the reciprocal problem of Soviet SLCMs describing possible and likely roles of Soviet nuclear and conventionally armed SLCMs and the importance of offering responses The increasingly important question of how SLCMs might be used in the developing world both by and against U S forces and security partners is considered in Chapter 5 an especially relevant discussion in light of the apparent success of the Tomahawk SLCM in the 1991 war with Iraq The next two chapters describe SLCM arms control as it has been practiced and discuss from two vantage points the roles of future arms control and unilateral disarmament initiatives in addressing the disadvantages of SLCMs Finally the immediate implications of the previous chapters for policy practitioners are developed in

a chapter that focuses on specific policy recommendations This timely contribution is a reliable source of information on SLCMs for the interested public the non government arms control community naval personnel and members of both Congress and the administration
