International Intervention in the Balkans since 1995 Peter Siani-Davies, 2004-03-01 This volume offers an analysis of the activities of the international community in the Balkans since the 1995 Dayton Agreement There has been substantial investment in the region but so far the gains have been limited and doubts remain as to the extent that sustainable security has been enhanced There is a need for serious reassessment of policies and priorities but this depends on a careful analysis of past successes and failures The contributors seek to provide this by examining intervention not just in terms of military action and the activities of major international agencies at state level but also the activities of outside NGOs within the local environment

The Digital Environment and Small States in Europe Viktorija Car, Marta Zorko, 2025-07-25 The Digital Environment and Small States in Europe delves into how the digital revolution intersects with global security dynamics and reshapes the geopolitical landscape It sheds light on the geopolitical complexities inherent in the border regions of the European continent and proposes frameworks to better understand and engage with small state dynamics in international affairs At the heart of this book is an examination of the transformative power of digitalization and virtualization particularly pronounced in the context of small states Traditionally power was synonymous with territorial control but in today's world influence extends into the virtual realm Small states despite their physical limitations can leverage this virtual extension of territory to their advantage However realizing and strategically utilizing these advantages are essential for capitalizing on the opportunities presented Conversely small states lacking digital capabilities find themselves increasingly vulnerable in the virtual sphere facing heightened security threats and challenges Through a series of theoretical and case study based chapters this book offers insights into the strategies employed by small states to navigate these complexities and assert their influence on the global stage Key themes explored include the impact of digitalization on geopolitical dynamics the role of cybersecurity in safeguarding national interests and the emergence of digital diplomacy as a tool for statecraft The Digital Environment and Small States in Europe will be of great interest to scholars and students of international relations

geopolitics and political science as well as security media and communication studies. Additionally, policymakers and analysts involved in foreign policy and security affairs may find valuable insights in the book's exploration of small state strategies and vulnerabilities.

Constructing South East Europe Dimitar Bechev, 2011-03-15 Regional cooperation has become a distinctive feature of the Balkans, an area known for its turbulent politics. Exploring the origins and dynamics of this change, this book highlights the transformative power of the EU and other international actors.

Norms and Nannies Ronald Haly Linden, 2002 As the Central and East European states seek to join the European Union and NATO, they face challenging demands to adhere to specific European norms and standards. In this first comprehensive analysis, contributors examine how this process operates in a variety of domains including civil-military relations, social labor and regional relations, economic and information policies, and foreign policy. Each author considers what norms are generated by or absent from European international organizations, how they are communicated to prospective members, and most important, what impact they have had on the policies and actions of individual countries as well as on the region as a whole. These on-the-ground studies provide the empirical foundation needed to support theories of norm diffusion, constructivism, and liberalism in international relations and comparative politics alike.
