Educating Students with High Ability Catherine Clark,Bruce M. Shore,2004 Perceived to be academically successful highly able or gifted children often appear not to require much teacher assistance and subsequently are given less attention However these students do have needs and this book seeks to explain what these are and ways in which teachers can begin to meet them even when working in difficult circumstances with little support This revised second edition includes chapters on identification of high ability and the impact of that identification unrecognised ability teaching methods underachievement student teacher relations organisation of learning gender and culture general advice to teachers parental and community involvement *Gifted and Talented International* ,1994 Educating Able Children Catherine Clark,Ralph Callow,1998 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company Able Underachievers Diane Montgomery,2000-10-30 This text is a discussion of how to deal with able underachievers in education It concludes that teaching and learning methods need to be modified to become learning oriented and centred rather than subject oriented and teacher centred New Kinds Of Smart: Teaching Young People To Be Intelligent For Today'S World Lucas, Bill,Claxton, Guy,2010-03-01 New Kinds of Smart presents the most important of these changes to practising teachers and educators and invites them to think about their implications for school New Kinds of Smart: Teaching Young People to Be Intelligent for Today's World Bill Lucas,Guy Claxton,2010-03-16 How people think about education depends on how they understand the notion of intelligence Teaching reflects assumptions about what kinds of mental qualities are worth having and about the extent to which those qualities are fixed or malleable As the idea of intelligence changes so should the aims and methods of education It s time to bring intelligence into the real world In the early 21st century our understanding of the smart mind is changing fast The demands of society are now quite different from those when schools were first designed so the kinds of smart necessary to craft a happy and fulfilling life have changed As life becomes more complex ambiguous and uncertain so a different set of mental and emotional attitudes are needed to thrive Meanwhile researchers in the cognitive affective and learning sciences are developing new models of the smart mind that make it clear that bodies tools and social contacts are as much a part of intelligence as abstract problem solving New Kinds of Smart presents the most important of these changes to practising teachers and educators and invites them to think about their implications for school Each chapter illustrates the research behind one of the emerging new kinds of smart summarises the messages that this research has for

practitioners and presents practical examples tools and templates that educators can use to weave this new strand of thinking into their work as teachers and their lives as learners
