The Myth of Human Races Alain F. Corcos, 2012-01-01 The idea that human races exist is a socially constructed myth that has no grounding in science Regardless of skin hair or eye color stature or physiognomy we are all of one species Nonetheless scientists social scientists and pseudo scientists have for three centuries tried vainly to prove that distinctive and separate races of humanity exist These protagonists of race theory have based their flawed research on one or more of five specious assumptions humanity can be classified into groups using identifiable physical characteristics human characteristics are transmitted through the blood distinct human physical characteristics are inherited together physical features can be linked to human behavior human groups or races are by their very nature unequal and therefore they can be ranked in order of intellectual moral and cultural superiority The Myth of Human Races systematically dispels these fallacies and unravels the web of flawed research that has been woven to demonstrate the superiority of one group of people over another
