articles by well known international experts in individual fields The encyclopedia contains a broad spectrum of topics ranging from the atmospheric processes responsible for snow formation transformation of snow to ice and changes in their properties classification of ice and glaciers and their worldwide distribution glaciation and ice ages glacier dynamics glacier surface and subsurface characteristics geomorphic processes and landscape formation hydrology and sedimentary systems permafrost degradation hazards caused by cryospheric changes and trends of glacier retreat on the global scale along with the impact of climate change This book can serve as a source of reference at the undergraduate and graduate level and help to better understand snow ice and glaciers It will also be an indispensable tool containing specialized literature for geologists geographers climatologists hydrologists and water resources engineers as well as for those who are engaged in the practice of agricultural and civil engineering earth sciences environmental sciences and engineering ecosystem management and other relevant subjects Mitochondrial Medicine Salvatore DiMauro, Michio Hirano, Eric A. Schon, 2006-04-19

Mitochondrial dysfunction is increasingly being recognized as the basis of a wide variety of human diseases Providing an authoritative update on our current knowledge of mitochondrial medicine this text draws together world authorities from various fields to present general therapeutic strategies as well as the treatments presently available in different specialties thus making it essential reading for clinicians involved with the management of patients with mitochondrial diseases A unique work this text covers a range of specialties including cardiology ophthalmology otology nephrology gastroenterology hematology oncology and reproductive medicine and does not focus exclusively on the more commonly known neurologic conditions An accessible user friendly text it also presents translational concepts of mitochondrial biogenesis and genetics in vignettes related to specific questions raised by the disease under discussion rather than concentrating on basic science which can often intimidate clinicians This pioneering work is primarily directed to a clinical audience who are interested in the diverse and diagnostically challenging clinical presentations of mitochondrial diseases and their pathophysiology
