The decline was attributed to a severe rainy season culminating in extensive vine destroying rot and mildew. 15 Blanc du Bois and Black Spanish grapes are the dominant grapes produced in the Southeast Texas and Gulf Coast growing region comprising 74.7% of production. Combined in 2017 they represent 54.8% of statewide production in those grapes.

So You Think You Know California Wines? (2016) Marques Vickers, 2016-05-15. So You Think You Know California Wines is designed to simplify your understanding by identifying growing trends, grape descriptions, and the history of California wine production. The edition profiles the 27 top wine grapes and principal growing regions. The 81 page edition is ideal for wine collectors, winemakers, and anyone who appreciates a world class California vintage. The following are just fourteen from hundreds of little known facts about California wines and the 2015 grape harvest. 1. Of California's 3.7 million tons of wine grapes harvested in 2015, the Central Valley growing region raised 73% and 70% of the white wine grapes. California grows 17% more red wine grapes than white. In 1976, the red grape ratio was two to one over whites. 2. The Napa Valley accounted for only 4.5% of the red wine grapes and 2% of the white. The Sonoma Marin region accounted for 5% of the red and 4.7% of the white wine grapes. 3. The average value of Napa red wine grapes is over 10.12 times and for white grapes 6.12 times more than the Central Valley. Sonoma Marin's regional red grapes are valued over 6.12 times and for white grapes 5.12 times more. 4. The California drought had a negligible effect on the Central Valley's 2015 grape yields as production nearly equaled their 2014 figures. 5. Wine grape production yields declined dramatically in the Napa Valley 29.4%, Sonoma Marin 28.8%, Central Coast 28.8%, and Monterey Valley regions 37.8%. 6. Cabernet Sauvignon is the most lucratively priced wine grape in California and the second most cultivated. Napa Valley grape growers concentrated 59% of their red grape production into Cabernet Sauvignon. Its value is 14 times the Central Valley equivalent. Yields declined 23.37% in the premium wine regions. 7. During the 1976 harvest, Chardonnay represented less than 2% of California's white wine grape production. In the 2015 harvest, Chardonnay was the state's largest grown grape accounting for 38% of the white wine grapes and over 16% of the overall harvest production. 2105 yields were down 25.32% throughout premium wine regions. 8. Juice Valuation is the elemental cost of grape juice contained in a bottle of wine, excluding any related post harvest production expenses, financing costs, marketing expenses, and/or retail mark up. The 2015 juice price on a bottle of Napa Valley Cabernet Sauvignon was \$8.42, Zinfandel \$4.71, Merlot \$4.35, Pinot Noir \$3.76, and Chardonnay \$3.60. Within the Central Valley region, the comparable juice prices average between 40 and 75 cents per bottle. 9. During the 2015 harvest, the wine grapes that experienced the greatest production increase from 2014 included Symphony Barbera, Rubired, Pinot Gris, Muscat of Alexandria, Burger, and Petite Sirah. 10. During the 2015 harvest, the wine grapes that experienced the greatest production decrease from 2014 included Muscat Blanc, Triplett Blanc, Sauvignon Blanc, Cabernet Franc, Viognier, Grenache, Chenin Blanc, and Syrah. 11. Real Estate property values are the number one price determinant in the valuation of a grape's price. Elevated

land values in Napa and Sonoma County directly reflect the significantly appreciated grape values 12 Two of over thirty hybrid grapes introduced by University of California Davis viticulturist Dr Harold Olmo account for 17% of the overall red wine grape production 13 During the 1976 harvest six of the most popular California grapes were Carignan Grenache Barbera Ruby Cabernet French Colombard and Chenin Blanc Today only Rubired and French Colombard ranks in the top ten and both are used for blending or bulk wines 14 Production statistics become significant because planting decisions cannot be immediately adjusted Grapevines require three years after planting before yielding fruit and have an average lifespan of 27 years Many vines are replaced afterwards due to declining production yields and financial depreciation considerations

The Red-Light District of Butte Montana Marques Vickers,2017-06-20 This edition is an intimate photo examination of the infamous Butte Montana sex trade once nationally recognized during the late 19th and early 20th century Over 135 current photographs document the remnants of the famed copper mining town s prostitution core The work details historical anecdotes narratives on colorful personages and perspective on an era when prostitution was locally institutionalized The remaining Dumas Brothel is a profiled parlor house noteworthy for its operational longevity between 1890 1982 The Dumas is the longest tenured American house of prostitution The property weathered numerous reform movements and attempts towards forced closure by governmental authorities Owner tax evasion ultimately shuttered the property Across the road is the Blue Range Building the last street facing example of the lowest extremity of prostitution once employed within the district The seven sets of ground floor doors and adjacent windows housed segregated cubicles called cribs Diminutive cribs accommodated only a single bed and an occasional washbasin Lower esteemed prostitutes serviced clients from these utilitarian spaces Butte s prostitution industry reinforced a rigid hierarchy of distinguishing elite mistresses for the affluent and influential from lowly street solicitors The lifestyle of sex professionals was plagued by drug addiction financial debt sexually transmitted diseases pregnancy abortion violence and abuse by their patrons and jealousy motivated clients Suicide was common even amongst the highest regarded women within such a cannibalistic environment

Vickers,2017-11-21 Shadowlands is a photographic concept edition accentuating contours silhouettes and dominant color compositions of 150 photographic images Many of the images are recognizable icons and landmarks They are transformed into graphic arts appearance by employing photo imaging software The accompanying shadows create a foreboding and often sinister impression The result is a glimpse into the unconscious white space that frames and lightens photography

Photographer Marques Vickers has assembled a diverse portfolio of internationally compiled images Their reverse lighting reinvents the impression often upsetting our conventional interpretation of their substance and matter The effect mirrors the surrealists notion of superficially unseen structures that open the portal for interpretative meanings Imagery is enabled to transcend precise and simplistic definition **Herron Island, Washington** Marques Vickers,2017-05-06 Marques Vickers
