Social and Cultural Change Jay A. Weinstein, 1997 This book includes a comprehensive survey of the theories and principles employed by sociologists anthropologists and other social scientists in the study of sociocultural change Employing these tools the later chapters examine the major trends and challenges that face today s rapidly globalizing world Students are asked to consider how they can participate actively in shaping the events that affect their lives Among the book s pedagogical features are well over one hundred Web sites organized by chapter and topic which connect the text with contemporary events and commentary Visit our website for sample chapters

The Changing Face of Globalization Samir Dasgupta, 2004-12-08 Evaluating the impact of globalization on issues like altruism empowerment of women crime and violence culture area studies economy and production and the sociology of humanity this book makes the ethical and moral aspects of globalization its main concerns The complexities of the globalization process in the developing world are explored the debate between globalization and localization between indigenization and hybridization between equalization and inequalization The contributors also examines the consequences for transitional economies in their interactions with multinational corporations and the rise of the anti globalization movement in the past decade

Applying Social Statistics Jay Weinstein, 2010-01-15 While Applying Social Statistics is about social statistics and includes all of the topics generally covered in similar texts it is first and foremost a book about how sociologists use statistics Its emphasis is on statistical reasoning in sociology and on showing how these principles can be applied to numerous problems in a wide variety of contexts to answer effectively the question what s it for A main learning objective is to help students understand how and why social statistics is used Yet Weinstein s style and substance recognize that it is of equal or even greater importance that they begin to learn how to apply these principles and techniques themselves

A Dictionary of Nonprofit Terms and Concepts David Horton Smith, Robert A. Stebbins, Michael A. Dover, 2006-11-08 This reference work defines more than 1 200 terms and concepts that have been found useful in past research and theory on the nonprofit sector The entries reflect the importance of associations citizen participation philanthropy voluntary action nonprofit management volunteer administration leisure and political activities of nonprofits They also reflect a concern for the wider range of useful general concepts in theory and research that bear on the nonprofit sector and its manifestations in the United States and elsewhere This dictionary supplies some of the necessary foundational

work on the road toward a general theory of the nonprofit sector Encyclopedia of Populism in America Alexandra Kindell, Elizabeth S. Demers Ph.D., 2014-02-27 This comprehensive two volume encyclopedia documents how Populism which grew out of post Civil War agrarian discontent was the apex of populist impulses in American culture from colonial times to the present The Populist Movement was founded in the late 1800s when farmers and other agrarian workers formed cooperative societies to fight exploitation by big banks and corporations Today Populism encompasses both right wing and left wing movements organizations and icons This valuable encyclopedia examines how ordinary people have voiced their opposition to the prevailing political economic and social constructs of the past as well how the elite or leaders at the time have reacted to that opposition The entries spotlight the people events organizations and ideas that created this first major challenge to the two party system in the United States Additionally attention is paid to important historical actors who are not traditionally considered Populist but were instrumental in paving the way for the movement or vigorously resisted Populism s influence on American culture This encyclopedia also shows that Populism as a specific movement and populism as an idea have served alternately to further equal rights in America and to limit them **The Power of Scientific Knowledge** Reiner Grundmann, Nico Stehr, 2012-08-16 Examines how science and scientists influence policy making using the examples of eugenics Keynesian economics and climate policy *Global Communication* Yahya R. Kamalipour, 2019-07-05 Global Communication A Multicultural Perspective Third Edition is intended to explore inform and incite discussions about globalization and global communication With chapters by some of the foremost global communication scholars this book covers essential concepts of international communication and contemporary and emerging topics Kings, Queens and Fallen Monarchies Robert Stove, 2024-12-30 Explores the interwar movements to restore Europe s deposed royal houses examining their political significance and influence on global power dynamics Among the great hidden narratives of twentieth century history are the movements in Europe which between the two world wars aimed to restore the royal and imperial houses forced out of power in 1918 or in Portugal s case eight years earlier These efforts acquired media coverage and often strategic importance far greater than would be now supposed from the cursory often dismissive treatment which they have received from most historians since Campaigns to reinstate such dynasties as the Hohenzollerns the Habsburgs the Wittelsbachs the Bragan as and even France s House of Orleans were taken seriously at the highest governmental and journalistic levels in London and Paris not to mention the Holy See Upon the whole phenomenon this book seeks to shed light It discusses both the phenomenon s soft power manifestations the designs of newspaper tycoon Lord Rothermere upon the Hungarian throne for his son for instance and the phenomenon s hard power manifestations among which probably the most dramatic were the successful monarchical campaigns in Albania and Greece With a cast that includes not only the monarchist candidates themselves but Churchill Lloyd George Hitler Mussolini and Franco this is a drama that embraces a continent and forces thorough reappraisals of events which we thought we knew No one can read it

without acquiring a firmer grasp of political power's very nature and the sheer narrowness of the gap between victory and defeat

Love in America Lawrence R. Samuel, 2019-11-22 Widely considered the most complex of human emotions romantic love both shapes and reflects core societal values its expression offering a window into the cultural zeitgeist In popular culture romantic love has long been a mainstay of film television and music The gap between fictitious narratives of love and real life ones is however usually wide American's expectations of romance and affection often transcend reality Tracing the history of love in American culture this book offers insight into both the national character and emotional nature

Reluctant Bedfellows Meredith L. Ralston, Edna Keeble, 2009 Academic feminist theorizing and identity politics the two argue has reached the level of analysis paralysis where women and women's groups do not act for fear of being pejoratively labeled This has many negative consequences for rights seeking groups as Ralston and Keeble experience firsthand in working to bring Angeles City and Canadian women's organizations together Both an eye opening picture of the workings of a community seeped in sex tourism and a sharp review of current feminist theorizing *Reluctant Bedfellows* offers much needed perspective on ways to bring disputing parties together and actually promote change

Doing Sociology Jammie Price, Roger Straus, Jeff Breese, 2009-08-16 This successor to the well known *Using Sociology* covers standard topics found in any sociology textbook *Doing Sociology* walks lay readers through the steps of doing real life sociological practices as conducted by experts in the field The contributors to this volume range from university and college faculty government sociologists and practitioners from the private sector Each of the chapters is by intention and design a personal statement a case study illustrating how the authors practice sociology in their own words and style giving readers a clearer understanding of what sociologists do outside of teaching in universities And most importantly an understanding of what they could do with sociology Readable relevant and accessible *Doing Sociology* is an invaluable resource as a stand alone course reader or as a supplement to a traditional textbook

Social and Cultural Dynamics Emiliana Mangone, 2017-11-03 Marking the 50th anniversary of Pitirim A Sorokin's death this Brief offers a critical analysis of the renowned sociologist's theories while highlighting some of his more overlooked ones Topics explored include cultural dynamics the relationship between culture society and personality social mobility and the socio cultural causality of time and space In addition this book updates these theories by discussing their relevance in current cultural contexts The Brief aims to extend the work started by Sorokin on the promotion and application of integralism an approach that conceives the change of any sociocultural phenomena as the result of the combination of external and internal forces It uses this method to analyse socio cultural phenomena propose new policy and enhance the development of humanity from the point of view of culture This book also discusses sociology's relationship with other sciences In particular it touches upon the interplay between sociology and psychology and pushes for a new scientific awareness that is transdisciplinary The end point is a new vision of humanity and its development from a cultural context *Social and Cultural Dynamics* will be of interest to social scientists

sociologists and psychologists as well as professionals in these disciplines **Society & Culture , Why we need a revolution in the Social sciences: A post-colonial perspective** Sujay Rao Mandavilli,2024-05-11 We began our work in right and in serious earnest in the year 2005 November 14th 2005 to be precise when children s day is celebrated all over India in commemoration of the birthday of Pandit Jawaharlal Nehru the first Prime Minister of India The underlying philosophy of our work however stretches back to the early 1990 s even the mid 1980 s when we faced a great deal of cognitive dissonance in many of our endeavours and daily walks of life due to a constant exposure to and a bombardment by a large number of philosophies and ideas from different sources both human and non human In the year 2005 particularly after the aforesaid date we had reached out to several leading lights and luminaries in the fields of science religion philosophy and spirituality with a great deal of hope to meaningfully engage with them and elicit their own pet theories proposals and viewpoints on various issues and topics We had hoped that this would also help us in our own voyage and journey of discovery The results were indeed startling there was a wide variation in viewpoints based on the scholar in question s own religious linguistic and nationalistic affiliation and loyalties Therefore the age of ideology has still not formally or conceptually ended ending this can change many fundamental equations at a grassroots level and can make life better for all of us living in different parts of the world As a matter of fact Eurocentric biases in various fields of the social sciences has only served to throw up counter reactions and exacerbate ideological differences Intellectualism is also still weak in general particularly in developing countries particularly owing to the following factors Systems Science and Cybernetics - Volume II Francisco Parra-Luna,2009-10-30 The subject Systems sciences and cybernetics is the outcome of the convergence of a number of trends in a larger current of thought devoted to the growing complexity of primarily social objects and arising in response to the need for globalized treatment of such objects This has been magnified by the proliferation and publication of all manner of quantitative scientific data on such objects advances in the theories on their inter relations the enormous computational capacity provided by IT hardware and software and the critical revisiting of subject object interaction not to mention the urgent need to control the efficiency of complex systems where efficiency is understood to mean the ability to find a solution to many social problems including those posed on a planetary scale The result has been the forging of a new academically consolidated scientific trend going by the name of Systems Theory and Cybernetics with a comprehensive multi disciplinary focus and therefore apt for understanding realities still regarded to be inescapably chaotic This subject entry is subdivided into four sections The first an introduction to systemic theories addresses the historic development of the most commonly used systemic approaches from new concepts such as the so called geometry of thinking or the systemic treatment of non systemic identities to the taxonomic entropic axiological and ethical problems deriving from a general systemic cybernetic conceit Hence the focus in this section is on the historic and philosophical aspects of the subject Moreover it may be asserted today that beyond a shadow of a doubt problems in particular problems deriving from human interaction but in

general any problem regardless of its nature must be posed from a systemic perspective for otherwise the obstacles to their solution are insurmountable Reaching such a perspective requires taking at least the following well known steps a statement of the problem from the determinant variables or phenomena b adoption of theoretical models showing the interrelationships among such variables c use of the maximum amount of wherever possible quantitative information available on each d placement of the set of variables in an environment that inevitably pre determines the problem That epistemology would explain the substantial development of the systemic cybernetic approach in recent decades The articles in the second section deal in particular with the different methodological approaches developed when confronting real problems from issues that affect humanity as a whole to minor but specific questions arising in human organizations Certain sub themes are discussed by the various authors always from a didactic vantage including problem discovery and diagnosis and development of the respective critical theory the design of ad hoc strategies and methodologies the implementation of both qualitative soft system methodologies and formal and quantitative such as the General System Problem Solver or the axiological operational perspective approaches cross disciplinary integration and suitable methods for broaching psychological cultural and socio political dynamisms The third section is devoted to cybernetics in the present dual meaning of the term on the one hand control of the effectiveness of communication and actions and on the other the processes of self production of knowledge through reflection and the relationship between the observing subject and the observed object when the latter is also observer and the former observed Known as second order cybernetics this provides an avenue for rethinking the validity of knowledge such as for instance when viewed through what is known as bipolar feedback processes through which interactions create novelty complexity and diversity Finally the fourth section centres around artificial and computational intelligence addressing sub themes such as neural networks the simulated annealing that ranges from statistical thermodynamics to combinatory problem solving such as in the explanation of the role of adaptive systems or when discussing the relationship between biological and computational intelligence

using singular methods or approaches Theoretical Sociology Jonathan H. Turner, 2013 Written by award winning scholar Jonathan Turner Theoretical Sociology 1830 to the Present is a monumental book that offers in depth and comprehensive coverage of both the classical and modern traditions in sociological theory The text is divided into three key parts Part 1 provides detailed analyses of the theories of the classical tradition including the works of August Comte Herbert Spencer Karl Marx Max Weber Georg Simmel Emile Durkheim and George Herbert Mead Part 2 examines all of the principle theoretical traditions in sociology during the modern era including the functional general systems ecological evolutionary conflict exchange symbolic interactionist role and status dramaturgical phenomenological structuralist cultural postmodern European critical and American style critical theories Part 3 reviews the state of sociological theory today including scientific elements of theory and how to overcome roadblocks that have prevented sociological theories from realizing their full explanatory power **Integral Dynamics** Ronnie Lessem, Alexander Schieffer, Samuel D. Rima, 2016-05-23 The theory of integral dynamics is based on the view that the development of individual leaders or entrepreneurs requires the simultaneous development of institutions and societies It seeks a specific way forward for each society fundamentally different from but drawing on its past Nearly every natural science has been transformed from an analytically based approach to a dynamic one now it is time for society and culture to follow suit locally and globally Each culture discipline and person is incomplete and is in need of others in order to develop and evolve This book sets out a curriculum for a new integral trans cultural and trans disciplinary area of study inclusive of but extending beyond economics and enterprise It embraces a trans personal perspective linking self with community enterprise and society and focusing on the vital relationship between local identity and global integrity For the government policy maker the enlightened business practitioner and the student and researcher into economics and enterprise the new discipline is set out here in complete detail by a multi national team of Gower's Transformation and Innovation Series authors Illuminated with examples relating the conceptual to the practical this is a text not for a pre modern modern or even post modern era but for what has been called our trans modern age
