**Social Change and the Life Course** Matilda White Riley, 1988 **Social Dynamics of the Life Course** Walter R. Heinz, Victor W. Marshall, In the last two decades research on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market family solidarity education employment retirement and social policy It has also developed a special focus on crucial problems of sociological research which includes the understanding of micromacro phenomena the dynamics of social change and international comparisons Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies Industrial service societies are characterized by historically new contingencies of living arrangements and biographies These contingencies differ according to the extent to which life course patterns are regulated by social institutions In the continental European context institutional frameworks continue to define the timing and sequencing of transitions across the life course In less regulated market societies like the United States and Great Britain biographies and living arrangements are shaped more by the interaction of markets social networks and individual decisions In active welfare states institutional resources and rules continue to mediate the effects of social change on the life course What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality This trend supports young people and women in particular in their expectations concerning an egalitarian relationship This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit Thus the way in which people interact is profoundly impacted by the values and goals of equity demands Walter R Heinz is professor of sociology and social psychology and director Graduate School of Social Sciences University of Bremen Victor W Marshall is professor of sociology and director of the Institute on Aging University of North Carolina at Chapel Hill Carolina Social Change and the Life Course: Sociological lives American Sociological Association. Jonsson, Colin Mills, 2021-04-14 The empirical study of individuals life course is one of the most promising areas of research within sociology today Increased availability of large scale longitudinal data and improved statistical methods have made it possible to address theoretically relevant questions about events such as entrance into the labour market job mobility divorce and death This book consists of studies capturing the life course from the cradle to the grave The research questions include long term consequences of childhood conditions family formation and school careers work and parental leave gender discrimination in job promotion divorce and occupational career persistence in poverty and the intriguing question of why the highly educated tend to survive everyone else The studies shed light on the relation between family and work on gender inequality social class differences welfare state redistribution and labour market processes They do this in a particular context namely Sweden in the post war period that is during the decades that formed one of the most advanced welfare states in modern history One chapter provides a descriptive account of institutional and life course change in Sweden during that period Most authors use the Swedish level of living surveys a unique data set providing ample opportunity to study social processes in a longitudinal perspective The book will therefore be of relevance to those with interests in the Swedish welfare state as well as those with theoretical and research interests in the reproduction of inequality      **Sociological Life Course Research** Matthias Wingens, 2022-08-04 This introductory book provides an insight into sociological life course research and informs about its theoretical assumptions analytical concepts and main results Sociological life course research like biographical research has developed into an independent and fruitful field of research since the end of the 1960s It is true that half a century earlier in their famous study of *The Polish Peasant in Europe and America* 1918 20 Thomas and Znaniecki had already used life records to examine the connection between social change social structures and the life histories of individuals However such a research perspective was supplanted by other methodological conceptual approaches to empirical social research for over fifty years It was not until the 1960s that sociological interest in life course and biographical theoretical issues reawakened Today life course research is considered one of the most important conceptual innovations in sociology in recent decades The content The life course as a social construction What is life course research The life course as an institution Collective life courses generations cohorts and social change Structures of the life course Life course research a conceptual perspective Life course research quo vadis The author Prof Dr Matthias Wingens teaches sociology at the University of Bremen Bremen International Graduate School of Social Sciences BIGSSS      **Handbook on Demographic Change and the Lifecourse** Jane Falkingham, Maria

Doherty,Ralph LaRossa,Walter R. Schumm,Suzanne K. Steinmetz,1993-03-31 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project *The Handbook of Marriage and the Family* edited by Harold Christensen and published in 1964 the two *Contemporary Theories about the Family* volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the *Handbook of Marriage and the Family* edited by Marvin Sussman and Suzanne Steinmetz then in production **Higher Education and the Reproductive Life Course** Sarbani Banerjee,2006 This study examines the impact of higher educational attainment on the changing lives of women both at the individual and the societal level The study focusses on the cross cultural contexts in

one of the states in South India and the Netherlands Karnataka in the recent times is experiencing fertility transition while the Netherlands has already achieved fertility transition The two cultural contexts are both diverse and unique in character The author explores both the uniqueness as well as the similarities hence studying the impact of higher education on the changing lives of women as a continuum across cultures and societies Changes at the individual level are captured by distinguishing women into older and younger generations while changes at the societal level are captured through social change At the individual level we distinguish between the lived life course and the perceived life course At the societal level we focus on how higher educational attainment has enhanced women s position in the society The study uses secondary data from the National Family Health Survey 1998 1999 for the state of Karnataka and the Netherlands Family Fertility Survey OG 98 In addition to the secondary data in depth interviews were also conducted amongst women in Bangalore and Groningen
