*The Problems of Genocide* A. Dirk Moses, 2021-02-04 Genocide is not only a problem of mass death but

also of how as a relatively new idea and law it organizes and distorts thinking about civilian destruction Taking the normative perspective of civilian immunity from military attack A Dirk Moses argues that the implicit hierarchy of international criminal law atop which sits genocide as the crime of crimes blinds us to other types of humanly caused civilian death like bombing cities and the collateral damage of missile and drone strikes Talk of genocide then can function ideologically to detract from systematic violence against civilians perpetrated by governments of all types The Problems of Genocide contends that this violence is the consequence of permanent security imperatives the striving of states and armed groups seeking to found states to make themselves invulnerable to threats *Distortions to Agricultural Incentives in Europe's Transition Economies*

Kym Anderson, Johan Swinnen, 2008-06-05 The vast majority of the world's poorest households depend on farming for their livelihood During the 1960s and 1970s most developing countries imposed pro urban and anti agricultural policies while many high income countries restricted agricultural imports and subsidized their farmers Both sets of policies inhibited economic growth and poverty alleviation in developing countries Although progress has been made over the past two decades to reduce those policy biases many trade and welfare reducing price distortions remain between agriculture and other sectors as well as within the agricultural sector of both rich and poor countries Comprehensive empirical studies of the disarray in world agricultural markets first appeared approximately 20 years ago Since then the OECD has provided estimates each year of market distortions in high income countries but there has been no comparable estimates for the world's developing countries This volume is the first in a series other volumes cover Africa Asia and Latin America that not only fill that void for recent years but extend the estimates in a consistent and comparable way back in time and provide analytical narratives for scores of countries that shed light on the evolving nature and extent of policy interventions over the past half century *Distortions to Agricultural Incentives in Europe's Transition Economies* provides an overview of the evolution of distortions to agricultural incentives caused by price and trade policies in the economies of Eastern Europe and Central Asia that are transitioning away from central planning The book includes country and subregional studies of the ten transition economies of Central and Eastern Europe that joined the European Union in 2004 or 2007 of seven other large member countries of the Commonwealth of Independent States and of Turkey Together these countries comprise over 90 percent of the Europe and Central Asia region's population and GDP Sectoral trade and exchange rate policies in the region have changed greatly since the dissolution of the Soviet Union in 1991 but price distortions remain The new empirical indicators in these country studies provide a strong evidence based foundation for evaluating policy options in the years ahead

*Ukraine: Perestroika to Independence* T. Kuzio, 2016-01-03 The Ukrainian vote for independence in December 1991 effectively ended the existence of the Soviet Union and propelled one of Europe's submerged nations on to the world stage The main theme of the book is the transition in Ukraine from the policies of Perestroika and Glasnost to the ultimate break with Moscow **The History of the Galician Division of the Waffen SS** Michael James Melnyk, 2017-05-17 The first

**States of Violence and the Civilising Process** Rob Watts,2016-05-30 This book offers a distinctive and novel approach to state sponsored violence one of the major problems facing humanity in the previous and now the twenty first century It addresses the question how is it possible that large numbers of ordinary men and women are able to do the killing torturing and violence that defines crimes against humanity In his striking analysis Rob Watts shows how and why states of all political persuasions engage in crimes against humanity including genocide homicide torture kidnapping illegal surveillance and detention This book advances a new interpretive frame It argues against the civilizing process model showing how both states and social sciences like sociology and criminology have been complicit in splitting the social from the ethical while accepting too complacently that modern states are the exemplars of morality and rationality The book makes the case that it is possible to bring together in the one interpretative frame our understanding of social action involving personal motivation and ethical responsibility and patterns of collective social action operating in terms of the agencies of the State Rob Watts identifies and charts the pathways of action and practical i e ethical judgements which the perpetrators of these crimes against humanity constructed for themselves to make sense of what they were doing At once challenging and highly accessible the book reveals the policy making processes that produce state crime as well as showing how ordinary people do the state s dirty work

**Debating Genocide** Lisa Pine,2018-11-01 This book explores the subject of genocide through key debates and case studies It analyses the dynamics of genocide the processes and mechanisms of acts committed with the intention of destroying in whole or in part a national ethnic religious or racial group in order to shed light upon its origins characteristics and consequences Debating Genocide begins with an introduction to the concept of genocide It then examines the colonial genocides at the end of the 19th and start of the 20th centuries the Armenian Genocide of 1915 16 the Nazi Final Solution the Nazi genocide of the Gypsies mass murder in Cambodia under the Khmer Rouge the genocides in the 1990s in the former Yugoslavia and Rwanda and the genocide in Sudan in the early 21st century It also includes a thematic chapter which covers gender and genocide as well as issues of memory and memorialisation Finally the book considers how genocides end as well as the questions of resolution and denial with Lisa Pine examining the debates around prediction and prevention and the R2P Responsibility to Protect initiative This book is crucial for any students wanting to understand why

genocides have occurred why they still occur and what the key historical discussions around this subject entail The Hungarian Agricultural Miracle? Zsuzsanna Varga, 2020-11-09 This book examines Soviet agriculture in post 1945 Hungary It demonstrates how the agrarian lobby a development following the 1956 revolution led to contact with the West which allowed for the creation of an effective agricultural system The author argues that this Hungarian agricultural miracle a hybrid of American technology and Soviet structures was fundamental to the success of Hungarian collectivization

**The Last Man in Russia** Oliver Bullough, 2013-04-30 Russia is dying from within Oligarchs and oil barons may still dominate international news coverage but their prosperity masks a deep rooted demographic tragedy Faced with staggering population decline and near certain economic collapse driven by toxic levels of alcohol abuse Russia is also battling a deeper sickness a spiritual one born out of the country s long totalitarian experiment In *The Last Man in Russia* award winning journalist Oliver Bullough uses the tale of a lone priest to give life to this national crisis Father Dmitry Dudko a dissident Orthodox Christian was thrown into a Stalinist labor camp for writing poetry Undaunted on his release in the mid 1950s he began to preach to congregations across Russia with little concern for his own safety At a time when the Soviet government denied its subjects the prospect of advancement and turned friend against friend and brother against brother Dudko urged his followers to cling to hope He maintained a circle of sacred trust at the heart of one of history s most deceitful systems But as Bullough reveals this courageous group of believers was eventually shattered by a terrible act of betrayal one that exposes the full extent of the Communist tragedy Still Dudko s dream endures Although most Russians have forgotten the man himself the embers of hope that survived the darkness are once more beginning to burn Leading readers from a churchyard in Moscow to the snow blanketed ghost towns of rural Russia and from the forgotten graves of Stalin s victims to a rock festival in an old gulag camp *The Last Man in Russia* is at once a travelogue a sociological study a biography and a *cri de coeur* for a dying nation one that Bullough shows might yet be saved

**When Reporters Cross the Line** Stewart Purvis, Jeff Hulbert, 2013-09-05 *When Reporters Cross the Line* tells the true story of moments when the worlds of media propaganda politics espionage and crime collide casting journalism into controversy Its pages feature some of the best known names in British broadcasting including John Simpson Lindsey Hilsum and Charles Wheeler There are men and women who went beyond recognised journalistic conventions Some disregarded the code of their craft in the name of public interest some crossed the line in ways that had truly shocking consequences Many of the details have been kept as closely guarded secrets until now This unique account of modern reporting examines the lengths to which journalists on the front line are prepared to go to get a story or to espouse a cause Journalistic heroes and villains abound but certain of those heroes were flawed and some of the villains were surprisingly principled In the heat of war and political conflict boundaries are ignored and ethics forgotten and not just by opposing armies In this extraordinary book Stewart Purvis and Jeff Hulbert offer unparalleled access to the minds of reporters and to the often disturbing decisions they make when faced with extreme

situations In doing so it hammers home some unpalatable truths posing the fundamental question where do you draw the line

**Red Britain** Matthew Taunton,2019-04-04 Red Britain sets out a provocative rethinking of the cultural politics of mid century Britain by drawing attention to the extent diversity and longevity of the cultural effects of the Russian Revolution Drawing on new archival research and historical scholarship this book explores the conceptual discursive and formal reverberations of the Bolshevik Revolution in British literature and culture It provides new insight into canonical writers including Doris Lessing George Orwell Dorothy Richardson H G Wells and Raymond Williams as well bringing to attention a cast of less studied writers intellectuals journalists and visitors to the Soviet Union Red Britain shows that the cultural resonances of the Russian Revolution are more far reaching and various than has previously been acknowledged Each of the five chapters takes as its subject one particular problem or debate and investigates the ways in which it was politicised as a result of the Russian Revolution and the subsequent development of the Soviet state The chapters focus on the idea of the future numbers and arithmetic law and justice debates around agriculture and landowning and finally orality literacy and religion In all of these spheres Red Britain shows how the medievalist romantic oral pastoral anarchic and ethical emphases of English socialism clashed with and were sometimes overwritten by futurist utilitarian literate urban statist and economistic ideas associated with the Bolshevik Revolution *Genocide in the Age of the Nation State* Mark

Levene,2005-08-26 How should we understand genocide in the modern world As an aberration from the norms of a dominant liberal international society Or rather as a guide to the very dysfunctional nature of the international system itself The Meaning of Genocide is the first work of its nature to consider the phenomenon within a broad context of world historical development In this book Mark Levene sets out the conceptual issues in the study of genocide addressing the fundamental problems of defining genocide and understanding what we mean by perpetrators and victims before placing the phenomenon in the context of world history In an original and compelling argument Levene seeks to explain how state violence against a range of groups has emerged in tandem with the rise of the West to global dominance and the emergence of increasingly streamlined homogenous states Levene contends that it is in the relationship of these nation states to each other that we will find the well springs of some of the most poisonous tendencies in the modern world Thought provoking and beautifully constructed The Meaning of Genocide is the first of a major four volume survey Genocide in the Age of the Nation State which examines its subject within an extensive global and historical framework and which will become the definitive work on the subject

**"The Touch of Civilization"** Steven Sabol,2017-03-15 The Touch of Civilization is a comparative history of the United States and Russia during their efforts to colonize and assimilate two indigenous groups of people within their national borders the Sioux of the Great Plains and the Kazakhs of the Eurasian Steppe In the revealing juxtaposition of these two cases author Steven Sabol elucidates previously unexplored connections between the state building and colonizing projects these powers pursued in the nineteenth century This critical examination of internal colonization a form of

contiguous continental expansion imperialism and colonialism that incorporated indigenous lands and peoples draws a corollary between the westward moving American pioneer and the eastward moving Russian peasant Sabol examines how and why perceptions of the Sioux and Kazakhs as ostensibly uncivilized peoples and the Northern Plains and the Kazakh Steppe as uninhabited regions that ought to be settled reinforced American and Russian government sedentarization policies and land allotment programs In addition he illustrates how both countries encountered problems and conflicts with local populations while pursuing their national missions of colonization comparing the various forms of Sioux and Kazakh martial political social and cultural resistance evident throughout the nineteenth century Presenting a nuanced in depth history and contextualizing US and Russian colonialism in a global framework *The Touch of Civilization* will be of significant value to students and scholars of Russian history American and Native American history and the history of colonization

*Economic Analysis of Property Law Cases* Boudewijn R. A. Bouckaert, 2020-03-02 The discipline of law and economics has earned a reputation for developing plausible and empirically testable theories on the social functions and the impact of legal institutions Property rights are a field in which this has been very successful In this book economic property rights theories are applied to case law in order to examine the practice and solution of real life conflicts The author examines the economic problems which are dealt with in these cases and evaluate the courts decisions from an economic angle Cases are examined from across the UK the US Germany Belgium and Canada to allow international comparisons to be made These comparisons reveal that regardless of the legal system many legal issues have similar economic roots and therefore similar models of economic analysis can be applied The analysis of these cases also shows that the discipline of law and economics is not only successful in developing explanatory models but also useful to generate better considerations and solutions for legal conflicts in individual cases This book aims to bridge the gap between the academic and professional literature and demonstrate the benefits of the economic analysis of property rights cases to all those who are interested in law and economics

Minorities in Wartime Panikos Panayi, 2016-10-06 In this volume an international team explores the historical dimensions of a pervasive and controversial issue of our time the fate of ethnic groups in societies under severe stress Although this book focusses on the extreme situations of the two world wars parallels with more recent eruptions of violence and the widespread re emergence of racism in the wake of dislocation and disorientation of large populations are striking This pioneering book fills an obvious gap in the field of minority history and the study of war and society

*The Economics Of Coercion And Conflict* Mark Harrison, 2014-10-17 The papers brought together in this volume represent a decade of advances in the historical political economy of defence dictatorship and warfare They address defining events and institutions of the world in the twentieth century economic consequences of repression and violence the outcomes of two world wars and the rise and fall of communism They cross traditional disciplinary boundaries combining a broad sweep with close attention to measurement and narrative detail offering insights into these issues from economics history political science and statistics and

demonstrating in action the value of a multi disciplinary approach The author was one of the first economists to leverage the opening of former Soviet archives He has led international projects that reinvented the quantitative economics of the two world wars and contributed significantly to historical Soviet studies In 2012 he shared with Andrei Markevich the Russian National Prize for Applied Economics which was awarded in recognition of their research
