A History of

Modern Immunology Zoltan A. Nagy,2013-10-11 A History of Modern Immunology A Path Toward Understanding describes analyzes and conceptualizes several seminal events and discoveries in immunology in the last third of the 20th century the era when most questions about the biology of the immune system were raised and also found their answers Written by an eyewitness to this history the book gives insight into personal aspects of the important figures in the discipline and its data driven emphasis on understanding will benefit both young and experienced scientists This book provides a concise introduction to topics including immunological specificity antibody diversity monoclonal antibodies major histocompatibility complex antigen presentation T cell biology immunological tolerance and autoimmune disease This broad background of the discipline of immunology is a valuable companion for students of immunology research and clinical immunologists and research managers in the pharmaceutical and biotechnology industries Contains the history of major breakthroughs in immunology featured with authenticity and insider details Gives an insight into personal aspects of the players in the history of immunology Enables the reader to recognize and select data of heuristic value which elucidate important facets of the immune system Provides good examples and guidelines for the recognition and selection of what is important for the exploration of the immune system Gives clear separation of descriptive and interpretive parts allowing the reader to distinguish between facts and analysis provided by the author *Pioneers in Cell Physiology: The Story of Warren and Margaret Lewis* David H. Evans,2022-09-24 This monograph is dedicated to the lives and scientific achievements of the physiology pioneers Warren and Margaret Lewis Their story spans the first half of the 20th century from their respective educations through early independent research to joint research from 1910 to 1955 Among the numerous developments they initiated were the discovery of pinocytosis the beginnings of video microscopy and the development of the first mammalian tissue cultures Their research expanded the theoretical knowledge of cell structure and function On a more practical level they advanced many laboratory methods like the first recipes for culture media The text is beautifully enriched with personal anecdotes about their lives This is the story of two scientific pioneers in the context of early 20th century biology and physiology It is an inspiration for senior and aspiring researchers **The medical digest, a means of ready reference to the principal contributions to medical science during the last thirty years** Richard Neale,1891 **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **The Journal of the American Medical Association** ,1902 *The Evolution of Population Biology* Rama S. Singh,Marcy K. Uyenoyama,2004-01-15 This 2004 collection of essays deals with the foundation and historical development of population biology and its relationship to population genetics and population ecology on the one hand and to the rapidly growing fields of molecular quantitative

genetics genomics and bioinformatics on the other Such an interdisciplinary treatment of population biology has never been attempted before The volume is set in a historical context but it has an up to date coverage of material in various related fields The areas covered are the foundation of population biology life history evolution and demography density and frequency dependent selection recent advances in quantitative genetics and bioinformatics evolutionary case history of model organisms focusing on polymorphisms and selection mating system evolution and evolution in the hybrid zones and applied population biology including conservation infectious diseases and human diversity This is the third of three volumes published in honour of Richard Lewontin **Socrates and the Jews** Miriam Leonard, 2012-05-01 What has Athens to do with Jerusalem Asked by the early Christian Tertullian the question was vigorously debated in the nineteenth century While classics dominated the intellectual life of Europe Christianity still prevailed and conflicts raged between the religious and the secular Taking on the question of how the glories of the classical world could be reconciled with the Bible Socrates and the Jews explains how Judaism played a vital role in defining modern philhellenism Exploring the tension between Hebraism and Hellenism Miriam Leonard gracefully probes the philosophical tradition behind the development of classical philology and considers how the conflict became a preoccupation for the leading thinkers of modernity including Matthew Arnold Moses Mendelssohn Kant Marx Nietzsche and Freud For each she shows how the contrast between classical and biblical traditions is central to writings about rationalism political subjectivity and progress Illustrating how the encounter between Athens and Jerusalem became a lightning rod for intellectual concerns this book is a sophisticated addition to the history of ideas

Progress in Medicinal Chemistry , 1986-01-01 There are five main subject areas in this volume in the series on medicinal chemistry The first is a review of the understanding of Alzheimer s disease and the development of drugs for its treatment the second looking at recent efforts in modifying a naturally occurring anticancer camptothecin for chemotherapy the third covers the problem of getting a drug to a specific site within the context of phosphates and phosphonates a survey of sterilization using aldehydes for the destruction of microbes both inside and outside the human body is reviewed in the fourth and the last chapter is an account of the progress made in the biologically active enantiomer for complex synthetic asymmetric drug molecules *Neuromodulation* Irwin B. Levitan, 1987 Traditional neuroscience texts have stressed the output of neurons how they turn postsynaptic targets on or off cause muscles to twitch or convert photons into electrical pulses Neuromodulation alters that emphasis to examine how the responses of nerve cells can be modified Because a neuron s performance can be modulated brains of all animals exhibit the amazing capacity to learn Presenting the best studied examples Kaczmarek and Levitan provide the first detailed review of those potassium and calcium channels whose functions are modulated through receptor mediated second messenger mechanisms and that are thought to underlie many important kinds of neuronal plasticity This book which covers up to date biophysical work in both vertebrate and invertebrate neurons will be greatly appreciated by the readership the authors wish to reach neurophysiological biochemists and biochemical

Interrelationship Among Aging, Cancer and Differentiation A. Pullman, Paul O.P. Ts'O, Edward L. Schneider, 2012-12-06 In 1980 a distinguished group of scientists gathered in Washington D C for an International Symposium on Aging and Cancer Among the recommendations of this Symposium was to convene a future meeting to discuss the molecular basis for Interrelationships between aging and cancer when the appropriate scientific knowledge was available That same year the 13th Jerusalem Symposium on Quantum Chemistry and Biochemistry entitled Carcinogenesis: Fundamental Mechanisms and Environmental Effects was held attended by some 50 International authorities In this field At this meeting It became clear that the fundamental process of carcinogenesis is intimately associated with differentiation which must also be mechanistically related to aging It was therefore proposed that the next Jerusalem Symposium on Cancer could provide the appropriate forum for the study on the Interrelationship among cancer aging and differentiation The impressive advances in our knowledge of the nature of the genome through molecular genetic and physical chemical techniques have now provided the opportunity to examine the Interrelationships between these complex biological processes Through the isolation cloning and rearranging of genes we are able to dissect and manipulate the genome in a fashion that was unanticipated only a decade ago At the same time the increase in longevity and the increased numbers of individuals entering the last decades of life where cancer incidences are highest raise the profound and practical question of whether aging and cancer are linked through common mechanisms
