Taking the High Road Bruce Katz, Robert Puentes, 2006-05-25 Since the early 1990s federal transportation laws have slowly started to level the playing field between highway and alternative transportation strategies as well as between older and newer communities The Intermodal Surface Transportation Efficiency Act of 1991 and the Transportation Equity Act for the 21st Century made substantial changes in transportation practices These laws devolved greater responsibility for planning and implementation to urban development organizations and introduced more flexibility in the spending of federal highway and transit funds They also created a series of special programs to carry out important national objectives and they tightened the linkages between transportation spending and issues such as metropolitan air quality Taking the High Road examines the most pressing transportation challenges facing American cities suburbs and metropolitan areas The authors focus on the central issues in the ongoing debate and deliberations about the nation s transportation policy They go beyond the federal debate however to lay out an agenda for reform that responds directly to those responsible for putting these policies into practice leaders at the state metropolitan and local levels This book presents public officials with options for reform Hoping to build upon the progress and momentum of earlier transportation laws it ensures a better understanding of the problems and provides policymakers journalists and the public with a comprehensive guide to the numerous issues that must be addressed Topics include A wide ranging policy framework that addresses the reauthorization debate An examination of transportation

finance and how it affects cities and suburbs An analysis of metropolitan decisionmaking in transportation The challenges of transportation access for working families and the elderly The problems of increasing traffic congestion and the lack of adequate alternatives Contributors include Scot
