**Catalogue of Distributed File/Operating Systems** Uwe M. Borghoff,2012-12-06 In general distributed systems can be classified into Distributed File Systems DFS and Distributed Operating Systems DOS The survey which follows distinguishes between DFS approaches in Chapters 2 3 and DOS approaches in Chapters 4 5 Within DFS and DOS I further distinguish

traditional and object oriented approaches A traditional approach is one where processes are the active components in the systems and where the name space is hierarchically organized In a centralized environment UNIX would be a good example of a traditional approach On the other hand an object oriented approach deals with objects in which all information is encapsulated Some systems of importance do not fit into the DFS DOS classification I call these systems closely related and put them into Chapter 6 Chapter 7 contains a table of comparison This table gives a lucid overview summarizing the information provided and allowing for quick access The last chapter is added for the sake of completeness It contains very brief descriptions of other related systems These systems are of minor interest or do not provide transparency at all Sometimes I had to assign a system to this chapter simply for lack of adequate information about it
