

Skates & Rays

- Rays are usually larger than skates.
- Rays give birth to live young while skates lay eggs.
- Some rays (like the sting ray) contain venomous tails. Skates have NO venom.

Shadows in the Sea Harold W. McCormick, 2017-08-08 Captain Young and I for some years have been gathering material from all over the world about the Selachians the Sharks Skates Rays and their allies of which there are more than 600 known species We originally intended merely to up date Captain Young s book *Shark Shark* published by Gotham House in 1934 and now a collector s item but as the material ever expanded it was decided that an entirely new book covering a much broader field was needed Adaterial was collected from all over the world for many years When Captain Young and I felt that the research was nearly completed we called upon Tom Allen an experienced newspaperman to aid us in transforming the research material into a book Tom and I continued the research up to and beyond the completion of the manuscript Tom also did further research and added new material in the course of writing the book In all scientific classifications the Selachians are separated clearly from the Teleosteans or Bony Fishes and there are even leading ichthyologists ho do not regard the former as fishes at all but rather as representing a separate and distinct Class of animal life *Sharks, Skates and Rays* Perry W.
