of individual consumers and their motivations. Latterly there has been a marked turn towards more sophisticated economic and sociological analysis of attendance data. And as the film experience fragments across multiple formats, the perceptual and cognitive experience of the individual viewer who is also an auditor has become increasingly accessible. With contributions from Gregory Waller, John Sedgwick and Martin Barker, this work spans the spectrum of contemporary audience studies, revealing work being done on local, non-theatrical and live digital transmission audiences and on the relative attraction of large scale domestic and mobile platforms.
