Smallscale Brickmaking:

The Archaeology of Harriet Tubman's Life in Freedom Douglas V. Armstrong, 2022-09-09 Harriet Tubman's social activism as well as her efforts as a soldier nurse and spy have been retold in countless books and films and have justly elevated her to iconic status in American history. Given her fame and contributions, it is surprising how little is known of her later years and her continued efforts for social justice, women's rights, and care for the elderly. Tubman housed and cared for her extended family, parents, brothers, sisters, nieces, and nephews, as well as many other African Americans seeking refuge. Ultimately, her house just outside of Auburn, New York, would become a focal point of Tubman's expanded efforts to provide care to those who came to her seeking shelter and support in the form of the Harriet Tubman Home for the Aged. In this book, Armstrong reconstructs and interprets Tubman's public and private life in freedom through integrating his archaeological findings with historical research. The material record Tubman left behind sheds vital light on her life and the ways in which she interacted with local and national communities, giving readers a fuller understanding of her impact on the lives of African Americans. Armstrong's research is part of a wider effort to enhance public interpretation and engagement with the Harriet Tubman Home.

Clay Brick Making Everett Sinclair, 2025-02-27 Clay Brick Making explores the profound link between hand-crafted bricks and society, examining traditional brickmaking as a cultural practice shaping family structures and architectural landscapes. This book delves into how this foundational element of human civilization impacts skill transmission, labor dynamics, and community bonds. Traditional brickmaking, often overlooked, represents a sophisticated vernacular technology supporting family units and offering insights into sustainable development. The book progresses logically, beginning with the history and cultural significance of clay brick production. It then analyzes the family as a unit of production, investigates specific regional techniques, and focuses on the socio-economic impact on family livelihoods. Supported by ethnographic studies and interviews, the book offers a unique interdisciplinary approach combining anthropology, architecture, and economics to provide a holistic understanding beyond mere technical manuals.

It is about a search that has been going on officially in the developing world for over forty years and less officially in most countries since the beginning of time.
