## **So You Think You're Human A Brief History Of Humankind:**

**So You Think You're Human?** Felipe Fernández-Armesto, 2005 You think you're human But what does that mean How can humanity be defined Felipe Fernandez Armesto takes us on an enlightening and provocative journey through the history of humankind to reveal the challenges to our most fundamental belief that we are and have always been human Fernandez Armesto investigates advances in artificial intelligence and genetics and asks what these mean for the future of human values human rights and the defence of human dignity The book illustrates how our concept of humankind has changed over time and how our current understanding of this has been shaken by new challenges from science and philosophy *Global History, Globally* Sven Beckert, Dominic Sachsenmaier, 2018-02-22 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope *Global History Globally* addresses this lacuna by surveying the state of global history in different world regions Divided into three distinct but tightly interweaved sections the book's chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work The authors hail from various world regions and are themselves leading global historians Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them *Global History Globally* is a must read book for all students and scholars of global history

**Law's Meaning of Life** Ngaire Naffine, 2009-01-06 The perennial question posed by the philosophically inclined lawyer is What is law or perhaps What is the nature of law This book poses an associated but no less fundamental question about law which has received much less attention in the legal literature It is Who is law for Whenever people go to law they are judged for their suitability as legal persons They are given or refused rights and duties on the basis of ideas about who matters These ideas are basic to legal decision making they form the intellectual and moral underpinning of legal thought They help to determine whether law is essentially for rational human beings or whether it also speaks to and for human infants adults with impaired reasoning the comotose foetuses and even animals Are these the right kind of beings to enter legal relationships and so become legal persons Are they for example sufficiently rational or sacred or simply human Is law meant for them This book reveals and evaluates the type of thinking that goes into these fundamental legal and metaphysical determinations about who should be capable of bearing legal rights and duties It identifies and analyses four influential ways of thinking about law's person each with its own metaphysical suppositions One approach derives from rationalist philosophy a second from religion a third from evolutionary biology while the fourth is strictly legalistic and so endeavours to eschew metaphysics altogether The book offers a clear coherent and critical account of these complex moral

and intellectual processes entailed in the making of legal persons      **Animals on Television** Brett Mills, 2017-11-11 This book is the first in depth study of the representation of animals on television It explores the variety of ways animals are represented in audio visual media including wildlife documentaries and children s animated series and the consequences these representations have for those species Brett Mills discusses key ideas and approaches essential for thinking about animals drawing on relevant debates in philosophy politics gender studies humanism and posthumanism and ethics The chapters examine different animal representations focusing on zoos pets wildlife and meat They present case studies including discussions of Peppa Pig The Hunt and The Dog Whisperer This book will be of interest to readers exploring media studies contemporary television animal studies and debates about representation      *Religious Hatred* Paul Hedges, 2021-03-11 Why does religion inspire hatred Why do people in one religion sometimes hate people of another religion and also why do some religions inspire hatred from others This book shows how scholarly studies of prejudice identity formation and genocide studies can shed light on global examples of religious hatred The book is divided into four parts focusing respectively on theories of prejudice and violence historical developments of antisemitism Islamophobia and race contemporary Western antisemitism and Islamophobia and prejudices beyond the West in the Islamic Buddhist and Hindu traditions Each part ends with a special focus section Key features include A compelling synthesis of theories of prejudice identity and hatred to explain Islamophobia and antisemitism An innovative theory of human violence and genocide which explains the link to prejudice Case studies of both Western antisemitism and Islamophobia in history and today alongside global studies of Islamic antisemitism and Hindu and Buddhist Islamophobia Integrates discussion of race and racialisation as aspects of Islamophobic and antisemitic prejudice in relation to their framing in religious discourses Accessible for general readers and students it can be employed as a textbook for students or read with benefit by scholars for its novel synthesis and theories The book focuses on antisemitism and Islamophobia both in the West and beyond including examples of prejudices and hatred in the Islamic Hindu and Buddhist traditions Drawing on examples from Europe North America MENA South and Southeast Asia and Africa Paul Hedges points to common patterns while identifying the specifics of local context *Religious Hatred* is an essential guide for understanding the historical origins of religious hatred the manifestations of this hatred across diverse religious and cultural contexts and the strategies employed by activists and peacemakers to overcome this hatred      The Ecological Thought Timothy Morton, 2012-04-02 In this passionate lucid and surprising book Timothy Morton argues that all forms of life are connected in a vast entangling mesh This interconnectedness penetrates all dimensions of life No being construct or object can exist independently from the ecological entanglement Morton contends nor does Nature exist as an entity separate from the uglier or more synthetic elements of life      *Abysmal* Gunnar Olsson, 2010-03-15 People rely on reason to think about and navigate the abstract world of human relations in much the same way they rely on maps to study and traverse the physical world Starting from that simple

observation renowned geographer Gunnar Olsson offers in *Abysmal* an astonishingly erudite critique of the way human thought and action have become deeply immersed in the rhetoric of cartography and how this cartographic reasoning allows the powerful to map out other people's lives A spectacular reading of Western philosophy religion and mythology that draws on early maps and atlases Plato Kant and Wittgenstein Thomas Pynchon Gilgamesh and Marcel Duchamp *Abysmal* is itself a minimalist guide to the terrain of Western culture Olsson roams widely but always returns to the problems inherent in reason to question the outdated assumptions and fixed ideas that thinking cartographically entails A work of ambition scope and sharp wit *Abysmal* will appeal to an eclectic audience to geographers and cartographers but also to anyone interested in the history of ideas culture and art

**Before Humanity** Stefan Herbrechter, 2021-12-13 Before Humanity takes up the question of the post in the posthuman from the position of ancestrality Speculating about who or what comes after the human inevitably throws us back to our very beginnings The before in Before Humanity in this context takes on two meanings 1 what happened before we apparently became human which translates into a critical reading of paleo anthropology as well as evolutionary narratives of hominization 2 living through the end of a certain humanist anthropocentric notion of humanity what tasks lie before us which provokes a critical reading of the Anthropocene and current narratives of geologization In other words Before Humanity investigates conceptualizations of humanity and asks whether we have ever been human and if not what could or maybe what should we have been

the land of her birth In this brilliant vividly written book Rachel Holmes traces the full arc of Saartjie s extraordinary story a story of race eros oppression and fame that resonates powerfully today      *Radical Evolution* Joel Garreau,2006-05-09 Taking us behind the scenes with today s foremost researchers and pioneers bestselling author Joel Garreau shows that we are at a turning point in history At this moment we are engineering the next stage of human evolution Through advances in genetic robotic information and nanotechnologies we are altering our minds our memories our metabolisms our personalities our progeny and perhaps our very souls Radical Evolution reveals that the powers of our comic book superheroes already exist or are in development in hospitals labs and research facilities around the country from the revved up reflexes and speed of Spider Man and Superman to the enhanced mental acuity and memory capabilities of an advanced species Over the next fifteen years Garreau makes clear in this New York Times Book Club premiere selection these enhancements will become part of our everyday lives Where will they lead us To heaven where technology s promise to make us smarter vanquish illness and extend our lives is the answer to our prayers Or as some argue to hell where unrestrained technology brings about the ultimate destruction of our species      *Nature* Sir Norman Lockyer,2004      **Humanity's End** Nicholas Agar,2013-08-16 An argument that achieving millennial life spans or monumental intellects will destroy values that give meaning to human lives Proposals to make us smarter than the greatest geniuses or to add thousands of years to our life spans seem fit only for the spam folder or trash can And yet this is what contemporary advocates of radical enhancement offer in all seriousness They present a variety of technologies and therapies that will expand our capacities far beyond what is currently possible for human beings In Humanity s End Nicholas Agar argues against radical enhancement describing its destructive consequences Agar examines the proposals of four prominent radical enhancers Ray Kurzweil who argues that technology will enable our escape from human biology Aubrey de Grey who calls for anti aging therapies that will achieve longevity escape velocity Nick Bostrom who defends the morality and rationality of enhancement and James Hughes who envisions a harmonious democracy of the enhanced and the unenhanced Agar argues that the outcomes of radical enhancement could be darker than the rosy futures described by these thinkers The most dramatic means of enhancing our cognitive powers could in fact kill us the radical extension of our life span could eliminate experiences of great value from our lives and a situation in which some humans are radically enhanced and others are not could lead to tyranny of posthumans over humans
