Social Capital And Poor Communities:

Social Capital and Poor Communities Susan Saegert, J. Phillip Thompson, Mark R. Warren, 2002-01-10 Neighborhood support groups have always played a key role in helping the poor survive but combating poverty requires more than simply meeting the needs of day to day subsistence *Social Capital and Poor Communities* shows the significant achievements that can be made through collective strategies which empower the poor to become active partners in revitalizing their neighborhoods Trust and cooperation among residents and local organizations such as churches small businesses and unions form the basis of social capital which provides access to resources that would otherwise be out of reach to poor families *Social Capital and Poor Communities* examines civic initiatives that have built affordable housing fostered small businesses promoted neighborhood safety and increased political participation At the core of each initiative lie local institutions church congregations parent teacher groups tenant associations and community improvement alliances The contributors explore how such groups build networks of leaders and followers and how the social power they cultivate can be successfully transferred from smaller goals to broader political advocacy For example community based groups often become platforms for leaders hoping to run for local office Church based groups and interfaith organizations can lobby for affordable housing job training programs and school improvement *Social Capital and Poor Communities* convincingly demonstrates why building social capital is so important in enabling the poor to seek greater access to financial resources and public services As the contributors make clear this task is neither automatic nor easy The book's frank discussions of both successes and failures illustrate the pitfalls conflicts of interest resistance from power elites and racial exclusion that can threaten even the most promising initiatives The impressive evidence in this volume offers valuable insights into how goal formation leadership and cooperation can be effectively cultivated resulting in a remarkable force for change and a rich public life even for those communities mired in seemingly hopeless poverty A Volume in the Ford Foundation Series on Asset Building

Social Capital and Poor Communities Susan Saegert, J. Phillip Thompson, Mark R. Warren, 2005-11-17 Neighborhood support groups have always played a key role in helping the poor survive but combating poverty requires more than simply meeting the needs of day to day subsistence *Social Capital and Poor Communities* shows the significant achievements that can be made through collective strategies which empower the poor to become active partners in revitalizing their neighborhoods Trust and cooperation among residents and local organizations such as churches small businesses and unions form the basis of social capital which provides access to resources that would otherwise be out of reach to poor families *Social Capital and Poor Communities* examines civic initiatives that have built affordable housing fostered small businesses promoted neighborhood safety and increased political participation At the core of each initiative lie local institutions church congregations parent teacher groups tenant associations and community improvement alliances The contributors explore how such groups build networks of leaders and followers and how the social power they cultivate can be successfully

transferred from smaller goals to broader political advocacy For example community based groups often become platforms for leaders hoping to run for local office Church based groups and interfaith organizations can lobby for affordable housing job training programs and school improvement Social Capital and Poor Communities convincingly demonstrates why building social capital is so important in enabling the poor to seek greater access to financial resources and public services As the contributors make clear this task is neither automatic nor easy The book s frank discussions of both successes and failures illustrate the pitfalls conflicts of interest resistance from power elites and racial exclusion that can threaten even the most promising initiatives The impressive evidence in this volume offers valuable insights into how goal formation leadership and cooperation can be effectively cultivated resulting in a remarkable force for change and a rich public life even for those communities mired in seemingly hopeless poverty A Volume in the Ford Foundation Series on Asset Building Social Capital in Poor Communities Carlos Alberto Torres Vitolas,2011 This thesis examines the prospective value of social capital for developmental purposes It contends that the role that social relationships play in poor actors efforts to cope with and move out of poverty needs to be assessed under a dual understanding of social structure as both the medium and outcome of social action The study adopts Bourdieu s theory of practice as its main theoretical approach Actors investments in and uses of relationships were analysed in relation to their objective conditions stocks of capital and associated practices and strategies Social capital was operationalised as both networks of relations local external and vertical and social resources mediated access to assets of local economic relevance This approach was empirically examined via a two year longitudinal study that followed the experiences of residents of two poor rural villages located in the Department of Lambayeque in Northern Peru with regard to their quotidian practices and involvement in a participatory development intervention that conducted basic infrastructure productive and informational investments The study used a mixed method approach comprising in depth and unstructured interviews with residents and project staff household surveys three waves and participatory observation The evidence obtained showed that residents make extensive use of their relationships for economic purposes Most valuable social resources and connections however were unequally accessed by residents according to their levels of poverty This unequal re production of social capital was found to be related to actors material conditions and quotidian practices This social dynamic tended to be reproduced within the participatory intervention examined leading to an unequal expansion of social capital and related benefits among its beneficiaries The study concludes that the structural conditionality of the processes of using and building social capital makes it intimately associated with socioeconomic inequalities The theoretical and practical implications of this work are discussed in the concluding chapter *Paradoxes of Social Capital* Myriam Cherti,2025-10-01 *Paradoxes of Social Capital* critically examines the robustness of social capital theory as an analytical tool in explaining the various integration patterns amongst Moroccans in London The book also considers how structural factors impact on the ways in which Moroccans across generations sustain access and use social

capital at the levels of family ethnic community migrant associations and schools Furthermore this research elaborates on how social capital serves as an identity resource that is continuously negotiated and redefined through in active group family ethnic religious and national memberships An original model of studying the second generation processes of adaptation viewed as transversal adaptation is also introduced shifting the focus from predetermined integration patterns to a circular and a longitudinal approach to integration where new opportunities and constraints emerge structured by the temporal flow of life trajectories

Clear, 2009-03-27 In the first detailed empirical exploration of the effects of mass incarceration on poor places Imprisoning Communities demonstrates that in high doses incarceration contributes to the very social problems it is intended to solve it breaks up family and social networks deprives siblings spouses and parents of emotional and financial support and threatens the economic and political infrastructure of already struggling neighborhoods Especially at risk are children who research shows are more likely to commit a crime if a father or brother has been to prison Clear makes the counterintuitive point that when incarceration concentrates at high levels crime rates will go up Removal in other words has exactly the opposite of its intended effect it destabilizes the community thus further reducing public safety

Marginality, Power and Social Structure Rutledge M. Dennis, 2005-04-08 The articles in this book are intended to be a much needed corrective to the literature on marginality In the recent past and at present the concept of marginality has been used with little specificity and when used with specificity the delineation of the complex dimensions of the term has been less than satisfactory To illustrate the many ways in which marginality exists and operates in many societies Rutledge Dennis has assembled a rich array of articles designed to highlight the history and evolution of the concept of marginality along with the theorists issues and situations which prompted the use of the term and the issues for which the term is applicable today The very title of the volume comes into play here because though many of the early marginality theorists took the term into the realm of psychology the contributors to this volume who discussed the theory highlighted the social structural foundation of marginality Dennis sought a marriage of theory and research while assembling the articles for this volume For this reason he actively sought papers which used divergent research strategies to uncover the existence of marginality in its various forms and contexts Thus some of the papers utilize ethnographic and life history approaches whereas others use statistical analysis and historical data analysis In addition to theoretical and methodological concerns a major theme for this volume is the combination of both theory and method towards an investigation of issues and problems emanate from the social structure and are closely linked to power and domination
