Psychoimmunology is a rapidly maturing area of scientific endeavor that provides a compelling integrative link between the

immune system and its response to stress and psychiatric illness Stress initiates pathological changes by activating the immune and endocrine systems Inflammation is at the core of the complex and interactive systems that both contribute to and result from psychopathology Consequently inflammation research advances our knowledge of the pathology of depression schizophrenia chronic fatigue syndrome posttraumatic stress disorder and a host of co morbid conditions notably diabetes cardiovascular disease and cerebrovascular disease The possible mechanisms underlying the bidirectionality of co morbid medical and psychiatric disorders can be viewed as a consequence of inflammatory changes These emerging novel concepts illustrate how the knowledge of inflammation can enable meaningful integration of psychopathology with physical co morbidity The innovative articles in this volume highlight the intricate link between psychiatry and psychoimmunology and underscore the central role of inflammation in furthering our understanding of the pathophysiology underlying mental health and illness

Perspectives on Environment and Behavior Daniel Stokols, 2013-11-11 The inception of this volume can be traced to a series of Environmental Psychology Colloquia presented at the University of California Irvine during the spring of 1974 These colloquia were held in conjunction with Social Ecology 252 a graduate seminar on Man and the Environment Although the eight colloquia covered a wide range of topics and exemplified a diversity of research techniques they seemed to converge on some common theoretical and methodological assumptions about the nature of environment behavioral research The apparent continuities among these colloquia suggested the utility of developing a manuscript that would provide a historical overview of research on environment and behavior a representation of its major concerns and an analysis of its conceptual and empirical trends Thus expanded versions of the initial presentations were integrated with a supplemental set of invited manuscripts to yield the present volume of original contributions by leading researchers in the areas of ecological and environmental psychology
